

VASTRANGAM

What is inside VASTRANGAM_TENANT.zip

All 180 files, every one of them, with what each file says it is. Not a selection and not a summary of the interesting ones — the list below is the complete contents of the archive, and a checker opens the real zip and fails the build if a single entry is in one and not in the other.

How to read this

Files in the archive	180
Total size on disk	11.4 MB
Files whose description was read out of the file itself	127
Data files described by their own top-level keys	11
Images, fonts and rendered PDFs — no readable header	34
Files carrying no description at all, named below	6

Nothing in the "what it is" column was written about a file. Each line was read *out of* the file — the header comment a source file opens with, the first heading of a document, the top-level keys of a data file. A file that carries no description is reported as carrying none rather than given a guess, because a gap that says so can be closed and a guess cannot be found.

This archive is a configuration, not a program. It cannot be run on its own and it is not meant to be: it unzips *over* an extracted product archive and completes it. That is checked by extracting the product, running its suite with no tenant present, unzipping this over it, and running both suites again.

Where the files are, and what each area is for

Area	Files	Size
Start here	1	—
The delivered documents	14	1.1 MB
The payroll and attendance engine	35	568 KB
The AI content engine	18	208 KB
The registers — the lists everything else is derived from	4	1.4 MB
The document generators and the archive builders	37	3.6 MB
The earlier prototype app line	66	1.0 MB
Logos, fonts and the brand sheet	3	2.5 MB
Deployment, tooling and the build	2	1.0 MB

Start here

1 file · —. Written by the archive builder at the moment the archive was made. These are the first things to open: one names the commands that run everything else, the other says which of these files are worth reading and what each costs to read.

File	What it says it is	Size
VASTRANGAM_START_HERE.md	Written into the archive when it is built — what this is, and the commands that run it.	—

The delivered documents

14 files · **1.1 MB**. The reading matter — the plan, the design argued, the runbook, the rulebook, the audits, and this contents list. Each .md has a .pdf beside it rendered from the same source, so the two cannot disagree.

File	What it says it is	Size
PLAN_OF_ACTION.md	One platform. Every function.	304 KB
PROJECT_REPORT.md	Every module, every rule, every conflict, and the order to build it.	82 KB
SAMPLE_RUN_Teal_Chinon_Anarkali.md	Generated with the Humanized Engine.	14 KB
VASTRANGAM_BUILD_GUIDE.md	Setting this business up on Medhava, in order: from signing up to running live.	56 KB
VASTRANGAM_CONTENTS.md	Every file in this archive, with what each one says it is — the document you are reading.	—
VASTRANGAM_MODULES_COMPLETE.md	This is not the plan. The plan lists what each module is for.	52 KB
VASTRANGAM_PROMPT.md	Set the business up on Medhava, and build its own apps.	19 KB
VASTRANGAM_RULES_AND_LOGIC.md	Everything this business runs on: every rule, every calculation, and what the system refuses.	250 KB
VASTRANGAM_TENANT.SKILL.md	You are setting up one business on a platform you are not building.	12 KB
Vastrangam_AI_Content_Engine.SKILL.md	A single engine that converts any Vastrangam product into world-class, search-ranked output for any channel.	5 KB
Vastrangam_AI_Content_Engine.md	World-Class Omni-Channel Listing & Content System · Analysis-First · Phase 0 + 13 Phases · Ranks on SEO · AEO · AIO · SGO · SGE · GEO · SXO Channels: the storefront platform · Amazon · Flipkart · ...	61 KB
Vastrangam_AI_Engine_MANUAL.md	Module 14 · One studio, the whole catalogue workflow, one file.	33 KB
Vastrangam_Build_Roadmap.md	Everything, in one file: the ten stages from idea to launch, then all 31 modules, all 165 apps and all 302 rules in full — each rule with what the system does, what it refuses to do instead, and the...	255 KB
Vastrangam_Content_Engine_Humanized.md	Write like a person who loves this craft.	17 KB

The payroll and attendance engine

35 files · **568 KB**. Reads the business's own workbooks, resolves every staff-month to a rate and a basis, and reports what it could NOT resolve rather than paying zero. This is the single most finished piece of software in either archive.

app/web/00_bridge.js	browser → server	7 KB
research/build_mehendi_green_anarkali_doc.js	<i>no description in the file itself</i>	55 KB

The registers — the lists everything else is derived from

4 files · 1.4 MB. Modules, apps, rules, tools, the stack, the requirements registry, and the checkers that gate them. No count in any document here is typed: it is read from one of these files, which is why the counts have changed twice without a document going stale.

File	What it says it is	Size	
brand/site/INDEX_VASTRANGAM.md	A unified ERP: 21 modules and 113 apps over one shared data core.	48 KB	
brand/site/book_vastrangam.html	Vastrangam BOS — One business. One brain. \	Unified ERP with 165 apps	692 KB
brand/site/edition_vastrangam.js	THE VASTRANGAM EDITION — the same software, described in one trade's own words.	37 KB	
brand/site/index_vastrangam.html	Vastrangam BOS — One business. One brain. \	Unified ERP with 165 apps	692 KB

The document generators and the archive builders

37 files · 3.6 MB. Every delivered document is written by a script in here, from the registers above. To change a document you change its generator or its register, never the document — a hand-edit is overwritten the next time anything is built.

The earlier prototype app line

66 files · 1.0 MB. Sixteen single-file browser apps and the tooling that builds them, from before the core existed. They run with no server and no database, which is both why they were useful and why they are not the product.

File	What it says it is	Size
brand/suite/aiengine/05_store.js	Vastrangam AI Engine — image store (IndexedDB) localStorage cannot hold 20–30 full-resolution photos.	3 KB
brand/suite/aiengine/10_kernel.js	Vastrangam AI Engine — runtime kernel One global VA.	15 KB
brand/suite/aiengine/15_themes.js	Vastrangam AI Engine — theme engine Free themes + an AI theme generator, applied live by writing CSS custom properties onto :root.	6 KB
brand/suite/aiengine/16_theme_screen.js	Vastrangam AI Engine — Themes screen (free + AI, fully editable)	4 KB
brand/suite/aiengine/20_data.js	Vastrangam AI Engine — data + libraries The vocabulary libraries from the Content Engine spec, so generation is real and offline.	18 KB
brand/suite/aiengine/22_catalogue.js	Vastrangam AI Engine — Catalogue (bulk upload → vision → product → colour → pose) v3: the app LOOKS AT THE PHOTO.	30 KB
brand/suite/aiengine/23_composer.js	Vastrangam AI Engine — the composer	9 KB
brand/suite/aiengine/25_ai.js	Vastrangam AI Engine — the AI engine (primary path) v3 inverts v2.	29 KB
brand/suite/aiengine/27_edit.js	Vastrangam AI Engine — click anything, change it	5 KB
brand/suite/aiengine/28_studio.js	Vastrangam AI Engine — the AI Studio	13 KB
brand/suite/aiengine/29_brief.js	Vastrangam AI Engine — the product brief chat	21 KB
brand/suite/aiengine/30_content_engine.js	Vastrangam AI Engine — Content Engine (offline 13-phase generator)	46 KB
brand/suite/aiengine/31_run_view.js	Content run detail — the full generated pack	29 KB
brand/suite/aiengine/32_analysis.js	Vastrangam AI Engine — the full report .doc and the platform .xlsx	25 KB
brand/suite/aiengine/33_spec.js	Vastrangam AI Engine — the spec layer (the 61-column storefront import + the real QA gate) v2 shipped a 23-column sheet, 20 hashtags and a 10-slide carousel.	22 KB
brand/suite/aiengine/34_sku.js	Vastrangam AI Engine — SKU parsing & colour-variant grouping The catalogue used to treat RAYON_FOILPAN_WINE, RAYON_FOILPAN_BLACK, RAYON_FOILPAN_BLUE and RAYON_FOILPAN_RED as four unrelated products, each with its own title.	8 KB
brand/suite/aiengine/35_stock.js	Vastrangam AI Engine — the stock library Three tiers, free-first, the same shape as the model router:	21 KB
brand/suite/aiengine/36_library.js	Vastrangam AI Engine — the Library screen One place for every asset, in free-first order: Built-in (offline, unlimited) → My assets → Photos (Openverse free, Pexels/Unsplash keyed) → AI generated Anything can be sent straight into the...	15 KB
brand/suite/aiengine/37_deep.js	Vastrangam AI Engine — the deep 14-phase research + humanization run	35 KB
brand/suite/aiengine/38_inpaint.js	Vastrangam AI Engine — inpainting engine (watermark eraser) These six algorithms are the user's own, ported verbatim from their Vastrangam_Image_Studio_Pro.html so nothing they already had is lost.	23 KB
brand/suite/aiengine/39_studio_embed.js	Vastrangam AI Engine — Image Studio Pro, embedded whole The previous Image Studio was a re-interpretation and it lost most of what the original tool did.	12 KB
brand/suite/aiengine/45_gif.js	Compact GIF89a encoder — self-contained, offline Web-safe 216-colour palette + greys, nearest-colour mapping, LZW compression.	3 KB
brand/suite/aiengine/50_video_studio.js	Vastrangam AI Engine — Video Studio (timeline, keyframes, preview, offline export)	26 KB
brand/suite/aiengine/55_layout.js	Vastrangam AI Engine — layout engine This exists because of one screenshot: a "Web Banner" where the title ran off the right edge of the canvas, the subtitle sat on top of the title, and the price pill sat on top of both.	9 KB

File	What it says it is	Size
brand/suite/aiengine/60_design_studio.js	Vastrangam AI Engine — Design Studio (templates, brand kit, canvas)	11 KB
brand/suite/aiengine/61_design_extra.js	Vastrangam AI Engine — templates & the design gallery v2's "Web Banner" put the title through the right-hand edge, dropped the subtitle on top of it and parked the price pill over both, on a gradient that had nothing to do with the garment.	28 KB
brand/suite/aiengine/70_publisher.js	Vastrangam AI Engine — Publisher (channels, calendar, publish log)	12 KB
brand/suite/aiengine/80_records_files.js	Vastrangam AI Engine — Records + Files	9 KB
brand/suite/aiengine/90_assistant.js	Vastrangam AI Engine — Assistant (offline, reads live records, on every screen) A rules-based expert that always works with no internet and no key.	16 KB
brand/suite/aiengine/95_system.js	Vastrangam AI Engine — Connectors, Wiring, Backup & Health, self-tests	10 KB
brand/suite/aiengine/96_router.js	Vastrangam AI Engine — Connectors as the free-first model router Overrides the Connectors screen with the real router: free options first, paid last, keys pasted here and stored in the browser only (never committed).	8 KB
brand/suite/aiengine/97_tests_v2.js	Vastrangam AI Engine — v2 self-tests (catalogue, themes, router, analysis)	2 KB
brand/suite/aiengine/98_tests_v3.js	Vastrangam AI Engine — v3 self-tests Every check here corresponds to something the user actually found broken in v2.	36 KB
brand/suite/aiengine/99_boot.js	Vastrangam AI Engine — nav + boot	3 KB
brand/suite/aiengine/app.css	Vastrangam AI Engine — self-contained styles (no CDN, works offline)	31 KB
brand/suite/aiengine/assemble.js	<i>no description in the file itself</i>	7 KB
brand/suite/aiengine/display-0FL.txt	<i>no description in the file itself</i>	4 KB
brand/suite/aiengine/display.woff2	<i>binary — carries no readable header</i>	18 KB
brand/suite/aiengine/favicon.txt	<i>no description in the file itself</i>	5 KB

Vastrangam_AI_Engine.html	Vastrangam AI Engine	1018 KB

The PDFs, in a separate archive

4 documents · `VASTRANGAM_PDF.zip`. These are not in `VASTRANGAM_TENANT.zip` and that is deliberate. The archive states its own total size in the note inside it; this page cannot, because one of the files below is the PDF of this page.

Each one is rendered from a markdown file of the same name, and that markdown IS in this archive. So for anything reading the archive to build the software, the PDF was a second copy of a document it reads worse — and between them they were nearly half the archive's size. They ship in `VASTRANGAM_PDF.zip` instead, for reading.

If a PDF and its markdown ever disagree, the markdown is right. The PDF is rendered from it, so a PDF saying something different is an older rendering. In the repository `node brand/site/checkcoverage.js` fails the build when a PDF is older than its own source.

Document	Size
<code>VASTRANGAM_BUILD_GUIDE.pdf</code>	279 KB
<code>VASTRANGAM_CONTENTS.pdf</code>	—
<code>VASTRANGAM_RULES_AND_LOGIC.pdf</code>	1.0 MB
<code>Vastrangam_Build_Roadmap.pdf</code>	1.1 MB

The files that describe themselves, and the ones that do not

6 files in this archive carry no description of any kind — no header comment, no title, nothing readable at the top. They are named here rather than given a sentence somebody invented, and adding a header to any of them is a real improvement to the file rather than to this document:

- `brand/suite/aiengine/assemble.js` — 7 KB, no description in the file itself
- `brand/suite/aiengine/display-0FL.txt` — 4 KB, no description in the file itself
- `brand/suite/aiengine/favicon.txt` — 5 KB, no description in the file itself
- `brand/suite/aiengine/logo.txt` — 22 KB, no description in the file itself
- `brand/suite/aiengine/mkpdf.js` — 37 KB, no description in the file itself
- `research/build_mehendi_green_anarkali_doc.js` — 55 KB, no description in the file itself

The 34 images, fonts and rendered PDFs are not in that list. A PNG has no header to read, and the most a contents page can honestly say about one is its name and its size, which it does.

How to check this document is true

Do not take its word for it. From the repository:

```
node brand/site/checkcontents.js --summary
```

That opens both built archives and compares them entry by entry against these documents. It fails if the archive holds a file this page does not list, if this page lists a file the archive does not hold, if a stated count is not the length of its own list, or if a description here is not text that really occurs in the file it describes.

Every technical word above, in plain language

10 words. Every technical term this document uses, in plain language, with an everyday comparison. Nothing here assumes you already know any of them.

platform

One piece of software that many separate businesses use at the same time, each seeing only its own information.

Ek badi building jisme bahut saare offices hain. Building ek hai, par har office ki chaabi alag — koi kisi aur ke office mein nahin ghus sakta.

tenant

One business using the platform. Its people, its data and its settings are its own.

Us building mein ek office. Aapka office, aapka saamaan, aapka taala.

module

One area of work in the system — sales, purchase, staff, accounts. Each is a set of screens that belong together.

Dukaan ke alag-alag counters. Ek counter bikri ka, ek kharidi ka, ek hisaab-kitaab ka.

database

Where all the information is kept, arranged so any of it can be found instantly and nothing gets lost.

Ek badi almari jisme har cheez apne fix khaane mein rakhi hai — dhoondhne ke liye poori almari palatni nahin padti.

table

One kind of information inside the database — all your customers in one, all your orders in another.

Almari ka ek khaana. Ek khaane mein sirf customers, doosre mein sirf orders.

row

One single record — one customer, one order, one payment.

Register mein ek line. Ek line matlab ek entry.

backup

A copy of everything, kept somewhere else, so a mistake or a failure does not lose your work.

Zaroori kaagzaat ki photocopy, doosri jagah rakhi hui. Asli jal jaaye toh bhi kaam nahin rukta.

queue

A waiting line for work that does not have to finish this second — sending a hundred messages, building a big report.

Darzi ki dukaan ka parchi system. Kaam parchi pe likh ke lag gaya line mein; customer khada intezaar nahin karta.

deployment

Putting a new version of the software in place so people start using it.

Nayi dukaan kholna ya purani ko naya roop dena — jab tak shutter nahin uthta, customer ko farq nahin padta.

model

The piece of artificial intelligence that reads or writes text, tags a photograph, or answers a question.

Ek bahut padha-likha assistant. Kaam accha karta hai, par har baat pe usse poochho toh kharcha aur waqt dono lagta hai.
