

MEDHAVA

Product capability matrix

Every one of the 113 apps, under its module, with the rung it has reached and the 0–5 score that rung translates to.

This is the same measurement as the requirements registry, arranged by where a thing lives rather than by what proves it. A reader asking "how much of module 12 exists" gets an answer here in one row of a table; the registry answers "and what proves it" and carries the evidence.

Module by module

#	Module	Apps	Tested	Implemented	Specified	Score
01	Platform	8	2	0	6	1.8
02	Design & Sampling	2	0	0	2	1
03	Inventory & Catalog	4	1	0	3	1.8
04	CRM	4	3	0	1	3.3
05	Sales	8	5	0	3	2.9
06	Planning & Requirements (MRP)	3	0	0	3	1
07	Purchase	3	2	0	1	3
08	Manufacturing	4	0	0	4	1
09	Quality & Compliance	2	0	0	2	1
10	Warehouse	3	0	0	3	1
11	Logistics	5	0	0	5	1
12	Accounting & GST	9	0	0	9	1
13	Treasury & Financial Planning	3	0	0	3	1
14	Settlement	3	0	0	3	1
15	E-commerce / OMS	11	2	0	9	1.5
16	HR & Payroll	5	0	0	5	1
17	Marketing	8	0	0	8	1
18	AI Content Engine	8	1	0	7	1.4
19	SEO, AEO & AIO	3	0	0	3	1
20	Projects & Collaboration	7	0	0	7	1
21	Dashboard & BI	5	3	0	2	2.8
22	AI Assistant, Agents & Automation	5	0	0	5	1
All 22		113	19	0	94	1.5

A module scoring 1.0 has nothing standing up in it at all. **14 of the 22 score exactly 1.0** — modules 02, 06, 08, 09, 10, 11, 12, 13, 14, 16, 17, 19, 20, 22. Only 8 modules contain a single thing that runs.

The capabilities that are not apps

ID	Capability	Rung	Score
CAP-ISOLATION	Tenant isolation in the database	TESTED	4
CAP-SCHEMA	The production schema	TESTED	4
CAP-PACKS	Trade configuration as data	TESTED	4
CAP-GROUP	Multi-company consolidation	TESTED	4
CAP-SHELL	Sign-in, session and the web shell	TESTED	4
CAP-CI	Continuous integration	IMPLEMENTED	3
CAP-EVIDENCE	Verification evidence capture	TESTED	4
CAP-DOCS	Generated, gated documentation	TESTED	4
CAP-DEPLOY	Deployment to a production environment	NOT STARTED	0
CAP-PUBLISH	The static site published at a public URL	BLOCKED	0
CAP-MONITOR	Monitoring, alerting and health checks	SPECIFIED	1
CAP-INTEGRATIONS	Live outside integrations	BLOCKED	0
CAP-AI	AI gateway, agent permissions and evaluation	SPECIFIED	1
CAP-ANALYTICS	Query engine and report builder on real data	SPECIFIED	1
CAP-DEVPLATFORM	Developer platform — public API, webhooks, SDKs	NOT STARTED	0
CAP-STUDIO	Studio — building screens and flows without code	NOT STARTED	0
CAP-MARKETPLACE	Extension marketplace	NOT STARTED	0
CAP-MOBILE	Mobile	SPECIFIED	1
CAP-THREATMODEL	Threat model and adversarial security testing	NOT STARTED	0
CAP-SCALE	Behaviour at production scale	NOT STARTED	0

A matrix of apps alone would never mention that nothing is deployed, no integration is live, and four product surfaces have not been started. Those are rows here at the same rung definitions, for that reason.

Where every number here comes from

Nothing in this document is typed. It is generated by `node brand/delivery/website/mkaudit.js` and every figure is read at that moment from the register that owns it:

Fact	Register	Gate
modules and apps	<code>brand/site/modules.js</code>	<code>checkneutral.js</code> , <code>checkshape.js</code>
what each has reached	<code>brand/site/registry.js</code>	<code>checkregistry.js</code>
the 0–5 score and the queue	<code>brand/site/audit.js</code>	<code>checkaudit.js</code>
the capability comparison	<code>brand/site/zoho.js</code>	<code>checkzoho.js</code>
rules and their proofs	<code>brand/site/rules.js</code>	<code>checkrules.js</code>
recorded runs	<code>docs/verification/EVIDENCE.md</code>	<code>tools/evidence.js --check</code>

A figure in this document that disagrees with its register means the document is stale. Regenerate it; `npm test` refuses a stale one.

Every technical word above, in plain language

17 words. Every technical term this document uses, in plain language, with an everyday comparison. Nothing here assumes you already know any of them.

platform

One piece of software that many separate businesses use at the same time, each seeing only its own information.

Ek badi building jisme bahut saare offices hain. Building ek hai, par har office ki chaabi alag — koi kisi aur ke office mein nahin ghus sakta.

tenant

One business using the platform. Its people, its data and its settings are its own.

Us building mein ek office. Aapka office, aapka saamaan, aapka taala.

module

One area of work in the system — sales, purchase, staff, accounts. Each is a set of screens that belong together.

Dukaan ke alag-alag counters. Ek counter bikri ka, ek kharidi ka, ek hisaab-kitaab ka.

industry pack

A settings file that teaches the system your trade — what you call things, the stages your work moves through, the documents you issue.

Ek hi machine, alag-alag saancha. Saancha badal do, wahi machine doosri cheez banane lagti hai.

database

Where all the information is kept, arranged so any of it can be found instantly and nothing gets lost.

Ek badi almari jisme har cheez apne fix khaane mein rakhi hai — dhoondhne ke liye poori almari palatni nahin padti.

table

One kind of information inside the database — all your customers in one, all your orders in another.

Almari ka ek khaana. Ek khaane mein sirf customers, doosre mein sirf orders.

row

One single record — one customer, one order, one payment.

Register mein ek line. Ek line matlab ek entry.

schema

The written plan of what information the system keeps and how the pieces connect.

Makaan ka naksha. Deewar uthane se pehle kaagaz pe tay hota hai kaunsa kamra kahaan hai.

API

The agreed way two pieces of software talk to each other, so one can ask the other for something and get a predictable answer.

Waiter. Aap kitchen mein nahin jaate — waiter ko order dete ho, wahi khaana le aata hai. Waiter badal jaaye toh bhi order dene ka tarika wahi rehta hai.

queue

A waiting line for work that does not have to finish this second — sending a hundred messages, building a big report.

Darzi ki dukaan ka parchi system. Kaam parchi pe likh ke lag gaya line mein; customer khada intezaar nahin karta.

environment

A separate running copy of the system — one for trying things, one that customers actually use.

Rehearsal aur asli show. Practice alag jagah, taaki galti sabke saamne na ho.

deployment

Putting a new version of the software in place so people start using it.

Nayi dukaan kholna ya purani ko naya roop dena — jab tak shutter nahin utha, customer ko farq nahin padta.

continuous integration

A robot that checks every change automatically, before anyone can put it live.

Quality-check wala banda gate pe khada. Har maal nikalne se pehle usse guzarta hai.

model

The piece of artificial intelligence that reads or writes text, tags a photograph, or answers a question.

Ek bahut padha-likha assistant. Kaam accha karta hai, par har baat pe usse poochho toh kharcha aur waqt dono lagta hai.

provider

A company whose service the system uses — for messages, for payments, for artificial intelligence, for delivery.

Supplier. Ek supplier maal na de toh doosre se le lo — kaam nahin rukna chahiye.

role

What a person is allowed to see and do — a manager sees more than a counter staff member.

Chaabi ka guccha. Manager ke paas zyada chaabiyaan, staff ke paas kam.

permission

One specific thing a role is allowed to do, like approving a discount or viewing salaries.

Guchhe ki ek chaabi. Ek chaabi ek darwaza.
