

NEW Purchase is live — Procurement + Vendor Management →

Run your whole business on one system

Medhava replaces the eleven tools you run today — accounting, stock, marketplace orders, manufacturing, staff and GST — with one application where every number agrees with every other one. Record a goods receipt once, and your stock, your books, your quality record and your supplier score all move in the same instant.

Apps over one data core

1

Stock number for every SKU

7

Marketplaces connected

WHAT MEDHAVA IS

One application. Not eleven that talk to each other.

Every other suite sells you separate products and a sync job between them. Medhava is a single application over one set of records — so there is nothing to synchronise, and nothing to reconcile.

1

Enter it once

A goods receipt, a counter sale, a marketplace order — recorded in one place. Stock, the ledger, the quality record and the supplier scorecard all update in the same instant, because they are reading the same record.

2

Numbers that cannot disagree

One stock figure per SKU. One ledger. One order record. Not a copy per channel that somebody reconciles on Saturday. When the website says four are left, four are left.

3

Built for how India actually runs

GST with input credit on accepted goods, TDS and TCS, seven marketplaces, piece-rate artisan wages — and apps that keep working when the internet does not.

WHAT CHANGES FOR YOU

The same day, before and after

Nothing here is a new way to run your business. It is the work you already do, arranged so that it only has to be done once.

TODAY

- ✗ Log into seven seller panels, one at a time
- ✗ Copy each order into a sheet, then into the books
- ✗ Guess which stock figure is the real one
- ✗ Learn at month-end that a mill over-billed you
- ✗ Chase a marketplace shortfall you spotted six weeks late
- ✗ Ask three people for their file before you can see one number

WITH MEDHAHA

One queue, sorted by whichever order is closest to being late

The order writes itself into stock and into the ledger

There is one stock figure, so there is nothing to choose between

✓ An over-billed invoice cannot be paid — the match refuses it

✓ Every shortfall is on a screen the day the payout lands

✓ Open the dashboard. It was already up to date.

Medhava at a glance

What it is	A unified ERP: 15 modules and 59 apps sharing one data core and one event bus.
Shared data core	Item/SKU · Party · Stock · Ledger & Voucher · Order — every module reads and writes these.
Key difference	Not a suite of integrated apps. One application, so there is no sync step and no duplicate master data.
Compliance	Double-entry accounting with CGST/SGST/IGST, TDS, TCS, ITC on accepted goods, GSTR-1 and GSTR-3B.
Channels	Amazon, Flipkart, Myntra, Meesho, Ajio, Nykaa, JioMart, plus Shopify and WooCommerce.
Security	PostgreSQL row-level security per company; integrations use revocable scoped API keys in an AES-256-GCM vault — never account passwords.
Deployment	Hosted multi-tenant cloud, or single-file offline apps that run by double-clicking with no install.

THE PROBLEM

Your business runs on eleven tools that don't talk

Accounting in one place, stock in a spreadsheet, marketplace orders in seven seller panels, karigar wages in a notebook. Every month-end becomes an archaeology project.

Numbers that disagree

Stock says 40, the marketplace says 12, the books say something else again. Nobody knows which is right, so everyone guesses.

Work entered three times

The same invoice keyed into the seller panel, the spreadsheet and the accounting package. Three chances to be wrong.

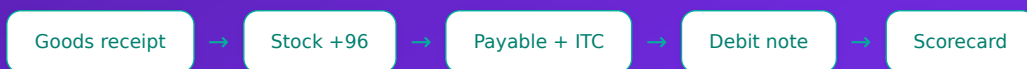

Money quietly leaking

Over-billed purchases, unclaimed marketplace shortfalls, RTO losses — invisible until the year is over.

HOW IT WORKS

One data core. One action cascades everywhere.

Every module reads and writes the same five entities. That is the physical reason a single goods receipt can touch stock, books, quality and sourcing at the same instant.

UNIFIED DATA CORE

Item / SKU

Party

Stock

Order

→ Inventory · stock in

→ Finance · payable & ITC

→ Quality · debit note

→ Sourcing · risk updated

← Planning · requirements

← Marketplace · order pull

Accepted — not ordered — is what counts

You order 100 metres. 100 arrive. Quality accepts 96. Most systems increase stock by 100 and claim tax credit on 100. Medhava increases stock by **96**, claims input tax credit on **96**, raises a debit note for the 4 rejected, and lowers that mill's accept rate — automatically.

Nothing derived is ever stored

Outstanding, risk, performance, aging, profit-per-design — all recomputed on read. They cannot drift out of step with the documents underneath them.

MODULES & APPS

15 modules. 59 apps. One login.

Each module is a complete area of your business. Turn on what you need today — everything else is already wired for the day you need it.

MODULE 01

Dashboard & BI

See the whole business without asking anyone.

Every number in Medhava rolls up here as work happens — no exports, no waiting for month-end, no asking three people for their sheet.

READS FROM

Every module

WRITES TO

—

CEO Dashboard

Cash, sales, stock, profit and alerts on one screen, refreshed as work happens.

Group Consolidation

Several companies, one set of figures — sales, cash, stock and profit rolled up across every company you run, inter-company entries removed, with years of history to compare against.

Report Builder

Drag the fields you want into a report and save it for the whole team.

3 APPS

MODULE 02

CRM

Know every customer completely — and answer them fast.

One record per customer carrying every lead, order, return, document and conversation, whichever channel it came from. Whoever picks up the next question can already see everything that came before it.

READS FROM

Every module

WRITES TO

SalesE-commerce / OMSMarketing

CRM & Customer 360

Lead to won, then the full lifetime: orders, returns, value and what to offer next.

Helpdesk & Live Chat

Questions arriving by chat, email or phone become tickets tied to the order or the account they are about, with the whole history already on the screen.

Documents & eSign

Every agreement, receipt, certificate and scan filed against the record it belongs to — an order, a party, a case, an employee — so it is found by that record instead of by remembering a folder. Send one out for signature and the signed copy files itself back.

3 APPS

MODULE 03

Sales

Every way you sell, one order book — to the doorstep.

Retail counter, wholesale, export and your own website all write to the same order and draw on the same stock number. The courier side lives here too, so a sale is not finished when it is billed — it is finished when it is delivered and the COD money is in.

READS FROM

Inventory & CatalogCRMWarehouseLogistics

WRITES TO

Settlement

WRITES TO

Inventory & Catalog

Accounting & GST

Warehouse

Logistics

Settlement

Marketplace OMS

Amazon, Flipkart, Myntra, Meesho, Ajio, Nykaa and JioMart in a single order queue.

Order Management

One pipeline from new to delivered, whatever channel it arrived on.

Manual Data Check

Upload the order and return sheets you already download from the panels — one file or a whole ZIP — and read ten cross-checks back: money, month, item, state, returns, claims, ads, payouts and GST. Every figure is clickable down to the transactions behind it, and the whole result downloads as Excel.

Reconciliation

Match every marketplace payout to the order line that earned it, and expose the gap.

Claims & Disputes

Turn shortfalls, weight disputes and lost parcels into filed claims with evidence.

Returns / RMA

Customer, courier and wrong returns — and the dead stock they actually cost you.

MODULE 05

Warehouse

Pick right the first time — and prove what you sent.

3

APPS

Bin-level instructions and barcode scanning, so the right item leaves the building and stock stays honest — and a recording of each parcel being packed, so an argument about what was in it is settled by footage instead of by memory.

READS FROM

Sales

E-commerce / OMS

Inventory & Catalog

WRITES TO

Inventory & Catalog

Sales

E-commerce / OMS

Picking & Bins

Pick lists that tell staff exactly which bin to walk to, in walking order.

Barcode Operations

Scan to pick, pack, dispatch and run a physical stock count from a phone.

Packing Video

Every parcel recorded as it is packed and indexed by its order number, so a wrong-item claim is answered with the clip. The footage attaches itself to the claim that needs it.

MODULE 06

Logistics

The courier network itself — rates, failures and the COD money.

3

APPS

Booking one parcel happens on the order, in Sales. This module is the network behind it: what every courier charges before you pick one, what happens to a delivery that fails, and whether the cash collected at the door actually reached your bank.

READS FROM

Sales

E-commerce / OMS

Warehouse

WRITES TO

Accounting & GST

Sales

E-commerce / OMS

Rates & Zones

Every courier's rate card by zone, weight slab and service — so the cheapest and the fastest option for this parcel are both known before it is booked.

NDR & RTO Rescue

A failed delivery worked while it can still be saved — reattempt, call, correct the address — before it becomes a return you pay for twice.

COD Remittance

What the courier collected at the door against what reached your bank, parcel by parcel, with every shortfall named and aged.

MODULE 07

Inventory & Catalog

One number everyone trusts.

2

APPS

The most important number in the system: one quantity per SKU, per location, per stage — read and written by every other module. And one product record that every channel lists from.

READS FROM

Every module

WRITES TO

Every module

Stock

Live quantity by SKU, location and stage, with reorder alerts, batches, kits and dead-stock.

Catalog / PIM

One product record — attributes, images, pricing and HSN — scored for channel readiness before it lists.

MODULE 08

Manufacturing

Know what a unit really costs to make.

6

APPS

From the first operation to the finished unit — including what every worker earned and what each product actually cost. You define the stages, the rates and the rules; nothing here is fixed to one trade.

READS FROM

HR & Payroll

Accounting & GST

PLM & Development

First idea to something you can actually make: specification, sample rounds, costed trials and sign-off, with every version kept. A product, a machined part, a formulation or a service package all move through stages you set yourself.

Production Orders

Your own stages from first operation to finished goods, with work-in-progress visible at each one.

Piece-rate & Contractors

Output-based pay for anyone paid by the piece rather than the hour — pooled completion, per-unit rates, rework and advances resolved into a single payout.

BOM & Consumption

What each product consumes, costed at today's material rates.

Quality Control

Accept, reject or rework — with reasons that feed the supplier scorecard.

Maintenance

Machines, tools and assets: what is due for service, when it was last done, what it cost, and what stopped while it was down. Planned and breakdown work against the same asset record.

MODULE 09

AVAILABLE NOW

Purchase

Nothing over-billed gets paid.

2

APPS

The buy side end to end — and the control that stops you paying for goods you rejected.

READS FROM

Inventory & Catalog

Accounting & GST

Quality Control

Procurement LIVE

RFQ to purchase order to goods receipt, with a strict three-way match before any bill is paid.

Vendor Management LIVE

Vendor 360, payables, ageing, a real risk score, and sourcing that follows performance.

MODULE 10

3

HR & Payroll

APPS

Pay people right, on time.

Salaries and output-based earnings in one register, with attendance driving both — whether people are on a monthly wage, an hourly rate or paid by what they finish.

READS FROM

Manufacturing

WRITES TO

Accounting & GST

Staff & Contractors

Attendance, effective-dated salary and output-based earnings in a single register, whoever is on it.

Time-off & Advances

Leave, festival advances, and exactly how they change this month's payout.

Appraisal & Hiring

Performance reviews and a hiring pipeline that ends in an employee record.

MODULE 11

Accounting & GST

Books that always balance.

5

APPS

A full double-entry ledger built for Indian compliance — not a tax report bolted onto a spreadsheet. Medhava keeps the books on its own: no other accounting package is required, ever.

READS FROM

Every module

WRITES TO

Finance Reports

Accounting

Double-entry books where every voucher balances and the trial balance always ties.

Expenses

Spend captured by category with approvals, and bill OCR to save typing.

Finance Reports

P&L, balance sheet, and profit by channel, product and SKU.

Invoicing

GST tax invoices and receipts, totals computed from the lines to the paise.

GST & Tax

CGST, SGST, IGST, TDS, TCS, input credit, GSTR-1 and GSTR-3B.

MODULE 12

Settlement

Get paid what you are owed — cycle by cycle.

3

APPS

Matching one payout to one order line happens in OMS. This module is the level above it: the settlement cycles each panel runs, the fees it actually charged against the fees it published, and the tax it deducted on your behalf.

READS FROM

E-commerce / OMS

Accounting & GST

WRITES TO

Accounting & GST

Payout Cycles

Every settlement cycle each panel runs — what it should pay, what actually landed in the bank, and on which day — so a late payout is visible the day it is late, not at month end.

TCS & TDS Register

Every rupee the panels deducted as TCS and TDS, matched against the portal's own figures — so the credit you claim is the credit you are actually owed.

Fee & Commission Audit

The rate card a panel publishes against the rate it actually charged, category by category and SKU by SKU. A silent commission increase is caught the first time it is applied.

MODULE 13

Marketing

Sell more without discounting.

4

APPS

Plan content, run campaigns, and let rules keep your prices competitive while protecting margin.

READS FROM

Inventory & Catalog

CRM

WRITES TO

Sales

E-commerce / OMS

Social Calendar

Plan and publish across every channel from one calendar.

Campaigns

Email, SMS and WhatsApp campaigns measured on real revenue, not opens.

Repricing Engine

Rules per channel and SKU — floor, ceiling, match-lowest, festival overrides.

Automation

If this happens, do that — across any module, without writing code.

MODULE 14

AI Content Engine

Write it, shoot it, cut it — from the catalogue you already have.

5

APPS

Listings, ads, email, product photography and reels, all generated from your own catalogue — so the words match the product and the picture is the right size for the channel it is going to. Words, images and video sit in one module because they are one job.

READS FROM

Inventory & Catalog

WRITES TO

Marketing

E-commerce / OMS

Content Engine

Channel-ready listings, social posts, ads, blogs and email in your own voice.

Video Studio

Text and image to video, reels and ad cuts sized for every channel.

Publisher

One push sends the finished listing, picture and copy everywhere it has to appear — your storefront, each marketplace, each social account — and reports back what actually went live and what was rejected, with the reason.

Image Studio

Layers, free transform, background removal, channel presets and SEO alt text — a phone photo becomes a channel-compliant product image.

Design Studio

A full design surface — templates, layers, undo and redo, any colour, exact sizing, background images and stock elements — exporting PNG, JPG or PDF at whatever size the channel or the printer asks for.

MODULE 15

Projects & Collaboration

The work that is not an order — and the talking around it.

3

APPS

Not every business runs on orders. A law firm runs on cases, an agency on engagements, a workshop on jobs, a builder on sites. This module holds that work on the same records as everything else, so the time, the cost, the documents and the decisions attached to it end up in the books rather than in somebody's inbox.

READS FROM

CRM

Sales

HR & Payroll

Inventory & Catalog

WRITES TO

Accounting & GST

HR & Payroll

CRM

Projects & Cases

A project, a case file, an engagement or a job — whatever your work is called. Stages you define, owners, deadlines, documents, billable time and real cost, all on one record the ledger can see.

Discuss

Conversation attached to the record it is about: this order, this bill, this case. A year later the reason for a decision is still sitting next to the decision.

Forum

Questions and answers that outlive a chat — for customers, dealers or staff — with the useful ones kept where the next person will actually find them.

PLATFORM · THE SPINE UNDER ALL 15

Platform

The spine every module runs on.

2

APPS

Not a module you open — the layer underneath all 15. Who can see what, how the system is configured, and a record of everything that ever happened.

READS FROM

Every module

WRITES TO

Every module

Identity, Settings & Audit

Users, roles and permissions, company switching, tax and numbering setup — and an immutable record of everything that ever happened.

Ask & Print

Ask from your phone, anywhere: a ledger, a bill, today's packing slips. It comes back as a PDF — or prints on the office printer, with nothing plugged into your phone.

BUILT DEEP, NOT WIDE

The controls that pay for the software

Three-way match

A supplier bill only passes when the purchase order, the goods receipt and the invoice agree on price and quantity. Bills that over-charge or over-bill rejected goods are held automatically, with the reason in plain language.

Vendor risk that sees ahead

Risk blends weak performance, spend concentration and overdue bills. Your *best* supplier still flags medium risk when 44% of your buying sits with them — the fact worth knowing before a disruption, not after.

Settlement reconciliation

Import a marketplace settlement, match it to the orders, and see every commission, TCS deduction, weight discrepancy and short payment — with a claim pack ready to file.

Karigar piece-rate

Pooled set completion, per-garment rates, alteration hours and advances roll into each artisan's payout — and into true cost-per-piece for every design.

One stock number

One quantity per SKU per location per stage, pushed to every channel. Overselling stops being a monthly apology.

AI studio built in

Listings, ad copy, product photography and reels generated against your own catalogue — not a bolted-on chatbot, but the same data core.

INDUSTRIES

One engine, any industry

Every app ships in two builds: a neutral unified-ERP configuration, and an industry configuration. The engine, formulas and tests are identical — only the master data differs.

Textile & apparel

Mills and zari suppliers, fabric in metres, karigar piece-rate, design-wise costing, HSN 5007/5208, marketplace returns and wrong-return dead stock.

Medical & pharma

Distributors, batch and expiry tracking, QC pass rate as accept rate, cold-chain locations, regulated document trails.

Manufacturing

Component suppliers, multi-level BOM, fill rate driving line stoppages, work orders, scrap and rework accounting.

Services

Subcontractors, milestone acceptance in place of goods receipt, timesheets, retainer billing and project profitability.

COMPARISON

Medhava vs. a suite of integrated apps

The difference is architectural, not cosmetic.

CAPABILITY	MEDHAVA	TYPICAL SUITE
Architecture	One app, one data core	Many apps, integrated
Master data	Single Item & Party record	Duplicated per app, synced
Stock truth	One number per SKU × location	Per-app, reconciled nightly
Cross-module posting	Instant, via event bus	Scheduled sync jobs
Marketplace settlement	Reconciled to order line + claim pack	Usually a separate tool
Piece-rate manufacturing	Built in	Custom development
AI content & imaging	Native, on your catalogue	Third-party add-on
Offline capability	Single-file apps run offline	Cloud-only

TRUST & SECURITY

Your credentials are never the key

Scoped keys only

Marketplace, bank and courier connections use revocable, scoped API keys held in an AES-256-GCM vault. Medhava never asks for, uses or stores an account password.

Isolation by row

Every record carries a company id and is enforced by PostgreSQL row-level security. Group companies stay separate but consolidate on demand.

Immutable audit

Every posting, price change and permission grant is written to an append-only trail with actor, timestamp and before/after values.

PRICING

QUESTIONS

Frequently asked

What is Medhava?

Medhava is a unified ERP made of 15 modules and 59 apps that all read and write one shared data core — Item/SKU, Party, Stock, Ledger and Order. Because the data is shared, a single action such as a goods receipt updates stock, the ledger, quality records and the vendor scorecard at the same time.

How is Medhava different from Zoho or Odoo?

Does Medhava support Indian GST?

Which marketplaces does Medhava connect to?

Can Medhava be used outside textiles?

Is my data safe?

Can I use it without internet?

How long does implementation take?

Stop reconciling. Start running.

See your own numbers inside Medhava. Bring one month of sales, purchases and stock — we will show you what your current tools are hiding.

Couriers & AWB

Book the shipment on the order itself, compare couriers, print the label and follow the AWB to the door.

MODULE 04

E-commerce / OMS

Seven marketplaces, one queue — and every rupee accounted for.

6

APPS

Stop logging into seven seller panels. Every marketplace order lands in one pipeline and your stock goes out to all of them — then the money side is closed out in the same module: what the panel paid, what it kept, what came back, and what you are still owed.

Warehouse

Logistics

Settlement

Marketplace OMS

Amazon, Flipkart, Myntra, Meesho, Ajio, Nykaa and JioMart in a single order queue.

Order Management

One pipeline from new to delivered, whatever channel it arrived on.

Manual Data Check

Upload the order and return sheets you already download from the panels — one file or a whole ZIP — and read ten cross-checks back: money, month, item, state, returns, claims, ads, payouts and GST. Every figure is clickable down to the transactions behind it, and the whole result downloads as Excel.

Reconciliation

Match every marketplace payout to the order line that earned it, and expose the gap.

Claims & Disputes

Turn shortfalls, weight disputes and lost parcels into filed claims with evidence.

Returns / RMA

Customer, courier and wrong returns — and the dead stock they actually cost you.

MODULE 05

Warehouse

Pick right the first time — and prove what you sent.

3

APPS

Bin-level instructions and barcode scanning, so the right item leaves the building and stock stays honest — and a recording of each parcel being packed, so an argument about what was in it is settled by footage instead of by memory.

E-commerce / OMS

Inventory & Catalog

WRITES TO

Inventory & Catalog

Sales

E-commerce / OMS

Picking & Bins

Pick lists that tell staff exactly which bin to walk to, in walking order.

Barcode Operations

Scan to pick, pack, dispatch and run a physical stock count from a phone.

Packing Video

Every parcel recorded as it is packed and indexed by its order number, so a wrong-item claim is answered with the clip. The footage attaches itself to the claim that needs it.

MODULE 06

Logistics

The courier network itself — rates, failures and the COD money.

3

APPS

Booking one parcel happens on the order, in Sales. This module is the network behind it: what every courier charges before you pick one, what happens to a delivery that fails, and whether the cash collected at the door actually reached your bank.

READS FROM

Sales

E-commerce / OMS

Warehouse

WRITES TO

Accounting & GST

Sales

E-commerce / OMS

Rates & Zones

Every courier’s rate card by zone, weight slab and service — so the cheapest and the fastest option for this parcel are both known before it is booked.

NDR & RTO Rescue

A failed delivery worked while it can still be saved — reattempt, call, correct the address — before it becomes a return you pay for twice.

COD Remittance

What the courier collected at the door against what reached your bank, parcel by parcel, with every shortfall named and aged.

MODULE 07

Inventory & Catalog

One number everyone trusts.

2

APPS

The most important number in the system: one quantity per SKU, per location, per stage — read and written by every other module. And one product record that every channel lists from.

READS FROM

Every module

WRITES TO

Every module

Stock

Live quantity by SKU, location and stage, with reorder alerts, batches, kits and dead-stock.

Catalog / PIM

One product record — attributes, images, pricing and HSN — scored for channel readiness before it lists.

MODULE 08

Manufacturing

Know what a unit really costs to make.

6

APPS

From the first operation to the finished unit — including what every worker earned and what each product actually cost. You define the stages, the rates and the rules; nothing here is fixed to one trade.

READS FROM

SalesPurchaseInventory & Catalog

WRITES TO

Inventory & CatalogHR & PayrollAccounting & GST

PLM & Development

First idea to something you can actually make: specification, sample rounds, costed trials and sign-off, with every version kept. A product, a machined part, a formulation or a service package all move through stages you set yourself.

Production Orders

Your own stages from first operation to finished goods, with work-in-progress visible at each one.

Piece-rate & Contractors

Output-based pay for anyone paid by the piece rather than the hour — pooled completion, per-unit rates, rework and advances resolved into a single payout.

BOM & Consumption

What each product consumes, costed at today’s material rates.

Quality Control

Accept, reject or rework — with reasons that feed the supplier scorecard.

Maintenance

Machines, tools and assets: what is due for service, when it was last done, what it cost, and what stopped while it was down. Planned and breakdown work against the same asset record.

MODULE 09 · AVAILABLE NOW

Purchase

Nothing over-billed gets paid.

2

APPS

The buy side end to end — and the control that stops you paying for goods you rejected.

READS FROM

Inventory & CatalogManufacturing

Procurement LIVE

RFQ to purchase order to goods receipt, with a strict three-way match before any bill is paid.

Vendor Management LIVE

Vendor 360, payables, ageing, a real risk score, and sourcing that follows performance.

MODULE 10

#

3

HR & Payroll

APPS

Pay people right, on time.

Salaries and output-based earnings in one register, with attendance driving both — whether people are on a monthly wage, an hourly rate or paid by what they finish.

READS FROM

Manufacturing

WRITES TO

Accounting & GST

Staff & Contractors

Attendance, effective-dated salary and output-based earnings in a single register, whoever is on it.

Time-off & Advances

Leave, festival advances, and exactly how they change this month's payout.

Appraisal & Hiring

Performance reviews and a hiring pipeline that ends in an employee record.

MODULE 11

Accounting & GST

Books that always balance.

5

APPS

A full double-entry ledger built for Indian compliance — not a tax report bolted onto a spreadsheet. Medhava keeps the books on its own: no other accounting package is required, ever.

READS FROM

Every module

WRITES TO

Finance Reports

Accounting

Double-entry books where every voucher balances and the trial balance always ties.

Invoicing

GST tax invoices and receipts, totals computed from the lines to the paise.

Expenses

Spend captured by category with approvals, and bill OCR to save typing.

GST & Tax

CGST, SGST, IGST, TDS, TCS, input credit, GSTR-1 and GSTR-3B.

Finance Reports

P&L, balance sheet, and profit by channel, product and SKU.

MODULE 12

Settlement

Get paid what you are owed — cycle by cycle.

3

APPS

Matching one payout to one order line happens in OMS. This module is the level above it: the settlement cycles each panel runs, the fees it actually charged against the fees it published, and the tax it deducted on your behalf.

READS FROM

E-commerce / OMS

Accounting & GST

WRITES TO

Accounting & GST

Payout Cycles

Every settlement cycle each panel runs — what it should pay, what actually landed in the bank, and on which day — so a late payout is visible the day it is late, not at month end.

Fee & Commission Audit

The rate card a panel publishes against the rate it actually charged, category by category and SKU by SKU. A silent commission increase is caught the first time it is applied.

TCS & TDS Register

Every rupee the panels deducted as TCS and TDS, matched against the portal's own figures — so the credit you claim is the credit you are actually owed.

MODULE 13

Marketing

Sell more without discounting.

4

APPS

Plan content, run campaigns, and let rules keep your prices competitive while protecting margin.

READS FROM

Inventory & Catalog

CRM

WRITES TO

Sales

E-commerce / OMS

Social Calendar

Plan and publish across every channel from one calendar.

Repricing Engine

Rules per channel and SKU — floor, ceiling, match-lowest, festival overrides.

Campaigns

Email, SMS and WhatsApp campaigns measured on real revenue, not opens.

Automation

If this happens, do that — across any module, without writing code.

MODULE 14

AI Content Engine

Write it, shoot it, cut it — from the catalogue you already have.

5

APPS

Listings, ads, email, product photography and reels, all generated from your own catalogue — so the words match the product and the picture is the right size for the channel it is going to. Words, images and video sit in one module because they are one job.

READS FROM

Inventory & Catalog

WRITES TO

Marketing

E-commerce / OMS

Content Engine

Channel-ready listings, social posts, ads, blogs and email in your own voice.

Video Studio

Text and image to video, reels and ad cuts sized for every channel.

Publisher

One push sends the finished listing, picture and copy everywhere it has to appear — your storefront, each marketplace, each social account — and reports back what actually went live and what was rejected, with the reason.

Image Studio

Layers, free transform, background removal, channel presets and SEO alt text — a phone photo becomes a channel-compliant product image.

Design Studio

A full design surface — templates, layers, undo and redo, any colour, exact sizing, background images and stock elements — exporting PNG, JPG or PDF at whatever size the channel or the printer asks for.

MODULE 15

Projects & Collaboration

The work that is not an order — and the talking around it.

3

APPS

Not every business runs on orders. A law firm runs on cases, an agency on engagements, a workshop on jobs, a builder on sites. This module holds that work on the same records as everything else, so the time, the cost, the documents and the decisions attached to it end up in the books rather than in somebody's inbox.

Inventory & Catalog

WRITES TO

Accounting & GST

HR & Payroll

CRM

Projects & Cases

A project, a case file, an engagement or a job — whatever your work is called. Stages you define, owners, deadlines, documents, billable time and real cost, all on one record the ledger can see.

Discuss

Conversation attached to the record it is about: this order, this bill, this case. A year later the reason for a decision is still sitting next to the decision.

Forum

Questions and answers that outlive a chat — for customers, dealers or staff — with the useful ones kept where the next person will actually find them.

PLATFORM · THE SPINE UNDER ALL 15

Platform

The spine every module runs on.

2

APPS

Not a module you open — the layer underneath all 15. Who can see what, how the system is configured, and a record of everything that ever happened.

READS FROM

Every module

WRITES TO

Every module

Identity, Settings & Audit

Users, roles and permissions, company switching, tax and numbering setup — and an immutable record of everything that ever happened.

Ask & Print

Ask from your phone, anywhere: a ledger, a bill, today's packing slips. It comes back as a PDF — or prints on the office printer, with nothing plugged into your phone.

BUILT DEEP, NOT WIDE

The controls that pay for the software

Three-way match

A supplier bill only passes when the purchase order, the goods receipt and the invoice agree on price and quantity. Bills that over-charge or over-bill rejected goods are held automatically, with the reason in plain language.

Vendor risk that sees ahead

Risk blends weak performance, spend concentration and overdue bills. Your *best* supplier still flags medium risk when 44% of your buying sits with them — the fact worth knowing before a disruption, not after.

Settlement reconciliation

Import a marketplace settlement, match it to the orders, and see every commission, TCS deduction, weight discrepancy and short payment — with a claim pack ready to file.

Karigar piece-rate

Pooled set completion, per-garment rates, alteration hours and advances roll into each artisan's payout — and into true cost-per-piece for every design.

One stock number

One quantity per SKU per location per stage, pushed to every channel. Overselling stops being a monthly apology.

AI studio built in

Listings, ad copy, product photography and reels generated against your own catalogue — not a bolted-on chatbot, but the same data core.

INDUSTRIES

One engine, any industry

Every app ships in two builds: a neutral unified-ERP configuration, and an industry configuration. The engine, formulas and tests are identical — only the master data differs.

Textile & apparel

Mills and zari suppliers, fabric in metres, karigar piece-rate, design-wise costing, HSN 5007/5208, marketplace returns and wrong-return dead stock.

Medical & pharma

Distributors, batch and expiry tracking, QC pass rate as accept rate, cold-chain locations, regulated document trails.

Manufacturing

Component suppliers, multi-level BOM, fill rate driving line stoppages, work orders, scrap and rework accounting.

Services

Subcontractors, milestone acceptance in place of goods receipt, timesheets, retainer billing and project profitability.

COMPARISON

Medhava vs. a suite of integrated apps

The difference is architectural, not cosmetic.

CAPABILITY	MEDHAVA	TYPICAL SUITE
Architecture	One app, one data core	Many apps, integrated
Master data	Single Item & Party record	Duplicated per app, synced
Stock truth	One number per SKU × location	Per-app, reconciled nightly
Cross-module posting	Instant, via event bus	Scheduled sync jobs
Marketplace settlement	Reconciled to order line + claim pack	Usually a separate tool
Piece-rate manufacturing	Built in	Custom development
AI content & imaging	Native, on your catalogue	Third-party add-on
Offline capability	Single-file apps run offline	Cloud-only

TRUST & SECURITY

Your credentials are never the key

Scoped keys only

Marketplace, bank and courier connections use revocable, scoped API keys held in an AES-256-GCM vault. Medhava never asks for, uses or stores an account password.

Isolation by row

Every record carries a company id and is enforced by PostgreSQL row-level security. Group companies stay separate but consolidate on demand.

Immutable audit

Every posting, price change and permission grant is written to an append-only trail with actor, timestamp and before/after values.

PRICING

Start free. Pay when it runs your business.

Per company, billed annually. Every plan includes all 15 modules — you are never upsold a module you already needed.

Talk to sales

QUESTIONS

Frequently asked

What is Medhava?

Medhava is a unified ERP made of 15 modules and 59 apps that all read and write one shared data core — Item/SKU, Party, Stock, Ledger and Order. Because the data is shared, a single action such as a goods receipt updates stock, the ledger, quality records and the vendor scorecard at the same time.

How is Medhava different from Zoho or Odoo?

Does Medhava support Indian GST?

Which marketplaces does Medhava connect to?

Can Medhava be used outside textiles?

Is my data safe?

Can I use it without internet?

How long does implementation take?

Stop reconciling. Start running.

See your own numbers inside Medhava. Bring one month of sales, purchases and stock — we will show you what your current tools are hiding.
