

MODULE 03 OF 16

Sales

D2C · B2B & Credit · Export · POS · Quotes & Proforma

5 apps × 2 editions — Medhava (any industry) and Vastrangam

Every way you sell, one order book. Your own storefront, the wholesale trade, exports, the counter and the quote that comes before any of them — all writing to the same order record and drawing on the same single stock number.

10 working apps

342 self-tests, all passing

42 workflow assertions

Zero console errors

What this module is

Module 01 told you **what is happening**. Module 02 told you **who with**. Module 03 is where the money is actually recorded.

Five apps, because a business does not sell one way. The counter, the website, the wholesale trade and the export container are genuinely different jobs with genuinely different rules — but they must all write to **one order record** and draw on **one stock number**, or the figures the first two modules read stop meaning anything.

The five apps

#	APP	THE RULE THAT MATTERS MOST	SCREENS	TESTS
1	D2C Sales	A COD order cannot be packed without a 20% advance	8	35
2	B2B & Credit	Over the credit limit, the order goes on hold — not through	8	35
3	Export	No papers, no sailing. All five, or it does not ship	8	34
4	POS	The bill will not print until the money covers it	8	33
5	Quotes & Proforma	A quote expires by itself; every revision is kept	7	34

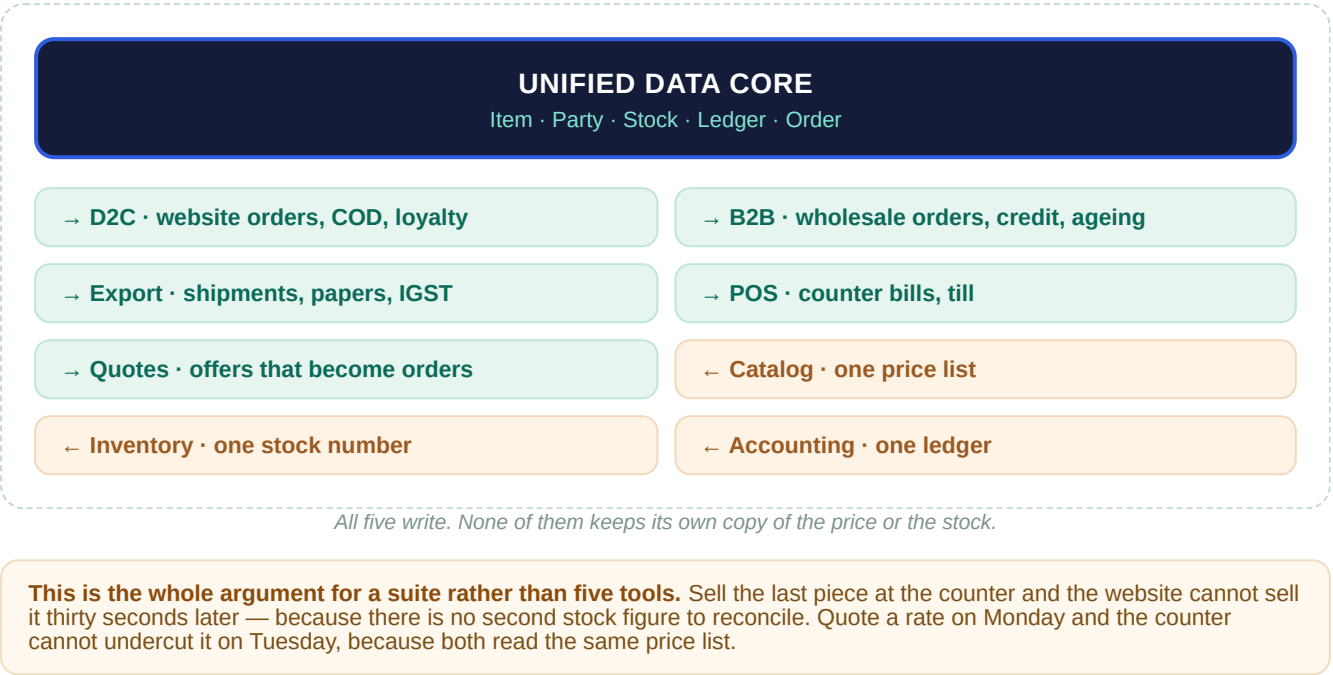

Each app has one rule that is a gate rather than a warning. A warning gets clicked through on a busy afternoon. Every one of those five gates exists because the thing it prevents is expensive: a refused parcel, a bad debt, a container at a port, a mystery in the till, a three-month-old price honoured by mistake.

Contents

6. What is in the ZIP, and how to open it
7. How this was verified
8. Where this sits, and what comes next

How the five apps sit on one order book

Five different sales motions. One order record, one stock number, one ledger.

Where each app hands over

APP	HANDS OVER TO	WHAT CROSSES
Quotes	D2C or B2B	A confirmed order with the agreed lines and total
D2C / B2B / POS / Export	Inventory	A stock movement — reserved, then out
D2C / B2B / POS / Export	Accounting	The sale, the tax, and any receivable
B2B / Export	Accounts Receivable	Money owed, aged against agreed terms
All five	CRM & the CEO Dashboard	The order, from which worth and net sales are derived

The five gates, side by side

Each app refuses to do one thing. These are the five, and what each one costs when it is only a warning.

APP	THE GATE	WHAT IT PREVENTS
D2C Sales	A COD order cannot be packed without a 20% advance	A refused parcel: courier fee both ways, goods back handled
B2B & Credit	An over-limit order goes on hold , never straight to approved	The bad debt that starts with one order approved "just this once"
Export	A shipment cannot be marked shipped with a paper missing	A container at a port earning demurrage over a scan
POS	A bill will not print until the payment covers it	An unexplained shortfall in the drawer at close
Quotes	An expired quote cannot be advanced — only re-quoted	Honouring a three-month-old price by accident

VB-709	Rangoli Boutique (Jaipur)	Cotton kurta set	72,000.00	69,120.00	2,880.00	Invoiced	Mark paid ..
VB-711	Kalamandir Chain (Hyderabad)	Bridal lehenga	2,67,000.00	2,34,960.00	32,040.00	Paid	settled
VB-712	Rajmandir Wholesale (Surat)	Banarasi saree	1,19,000.00	1,04,720.00	14,280.00	Paid	settled

On hold — the credit check refused these

1

ORDER	BUYER	WORTH	WHY	
VB-701	Rangoli Boutique (Jaipur)	34,17,600.00	Would take them ₹33,36,720.00 over the limit	Try again

Collect something, or raise the limit on the Credit screen, then press Try again. Nothing is lost — the order waits.

A gate doing its job: an over-limit wholesale order went on hold rather than being approved.

Every one of the five is a self-test as well as a gate. The app checks on startup that no record in its own data has got past the rule — so a gate cannot be quietly bypassed and then forgotten.

Nothing in this module is locked to one company

A rule that holds across all sixteen modules, and one that every app checks on itself at every launch: **no Medhava app depends on any single outside service.**

These five apps touch more outside services than any module so far — payment gateways, couriers, marketplaces, GST filing, printers, scanners, messaging. Every one of them is a capability with alternatives, and every one has an option that needs nobody.

CAPABILITY	OPTIONS, INCLUDING ONES THAT NEED NOBODY
Payments	Cash · UPI direct with your own QR (no commission) · Razorpay · PayU · Cashfree · PhonePe · Paytm · Stripe · CCAvenue
Couriers	Type the AWB in · your own delivery · Delhivery · Blue Dart · DTDC · Ecom · XpressBees · India Post · Shiprocket · NimbusPost
Sales channels	Type them in · CSV import · Amazon · Flipkart · Myntra · Meesho · Ajio · Nykaa · JioMart · Shopify · WooCommerce · your own store
GST & returns	Your CA files it · Medhava GST returns (built in) · the government's offline utility on your own machine · GSTN portal · ClearTax · Tally · BUSY · Zoho · Marg
Printing	Browser print / PDF · any ESC/POS thermal printer · Zebra · TVS · no printer at all
Barcode & scanning	Type the code · phone camera · any USB scanner · Bluetooth scanner · Zebra / Honeywell gun
Books & ledger	Medhava Books (built in) · Tally · BUSY · Marg · Zoho Books · QuickBooks · ERPNext (self-hosted) · CSV to your CA

Cloud services use a scoped, revocable key — never your account password. Medhava will never ask you for a marketplace, bank or account password. If any screen ever does, it is not Medhava.

The practical version: if your courier doubles its rate or your gateway changes its terms, you click a different button. You do not change software, you do not re-enter data, and you do not lose a day.

Medhava and Vastrangam, side by side

Same five engines, same self-tests, same arithmetic. Only the master data differs.

	MEDHAVA (UNIFIED ERP)	VASTRANGAM
Company	Acme Corp — stands in for any business	Vastrangam — ethnic-wear D2C + marketplace
Items	Standard · Premium · Accessory · Top-of-range	Cotton kurta set · Banarasi saree · Zari dupatta · Bridal lehenga
D2C coupons	FIRST10 · FEST15 · BULK20	FIRST10 · FESTIVE15 · TROUSSEAU20
Wholesale buyers	Northline Retail · Metro Distributors · Harbour Trading	Kalamandir Chain (Hyderabad) · Rajmandir Wholesale (Surat) · Anokhi Boutique (Jaipur)
Tiers	Key account · Regular trade · New/small	Chain/key account · Established boutique · New boutique
Export buyers	Gulf Textiles · Northgate Imports · Pacific Home Goods	Al Fahim Textiles (Dubai) · Saree House London · Desi Threads (New Jersey)
The counter	A shop counter	The Surat showroom
Engines	Identical. Five files, shared by both.	
Self-tests	Identical names, identical counts, all passing in both.	

Why ship both? The neutral edition is what a new customer in any industry receives. The Vastrangam edition is the proof the neutral engines survive a real business — real COD refusal rates, real boutique credit behaviour, real export paperwork. If a rule only works when the data is tidy, the Vastrangam build finds it first.

What is in the ZIP, and how to open it

```
Module_03_Sales__Medhava_and_Vastrangam.zip
├── READ_ME_FIRST.md
├── MEDHAVA_Module_03_Sales.zip      ← unified ERP, any industry
│   ├── MEDHAVA_Module_03_Sales/
│   │   ├── MEDHAVA_M03_START_HERE.md
│   │   ├── MEDHAVA_M03_Module_Overview.pdf
│   │   ├── App_01_D2C_Sales/      ( .html · _MANUAL.md · _WIRING.pdf )
│   │   ├── App_02_B2B_Credit/    ( .html · _MANUAL.md · _WIRING.pdf )

```

Opening it

1. **Extract the outer ZIP.** Windows: right-click → "Extract All". Mac: double-click it.
2. **Pick your edition** — **MEDHAVA_...zip** or **VASTRANGAM_...zip**. **Extract that one too.**
3. **Open the app folder** you want. Everything for that app is in it: the app, its manual, its PDF.
4. **Double-click the .html file.** Every filename starts with MEDHAVA_ or VASTRANGAM_, so you always know which edition you have open.

The one mistake to avoid: opening the HTML file directly from inside a ZIP. Windows unpacks it to a temporary folder that gets wiped, so your data appears to vanish. Always extract first.

All five apps can be open at once. Each keeps its own data, so nothing collides — and in the hosted version they share one order book, which is what the Wiring screen in each app describes.

How this was verified

Ten builds, three gates each. Nothing shipped on the basis that it looked right on screen.

- 1 The arithmetic, with no screen involved.** Each engine run in isolation, its self-tests executed against the seeded data. **342 tests across the ten builds, all passing.**
- 2 Every screen and every control, in a real browser.** Each build opened in headless Chromium; every screen visited and every interactive control on it clicked — including all 71+ provider buttons on the Connectors screen.
- 3 The real job, with the result asserted.** Not "does the button click" but "did the thing happen": **42 workflow assertions** across the five apps. A control that looks alive but changes nothing fails the build.

What the workflow run actually does, and checks

APP	IT DOES	AND ASSERTS
D2C	Places an order; tries to pack an under-paid COD order; recovers a cart; redeems points	The order count rose · the COD order stayed unpacked · a real order appeared from the cart · the points balance moved
B2B	Raises an over-limit order, then a normal one; raises a limit	The first went on hold · the second went through · the headroom changed
Export	Changes the exchange rate; tries to sail with a paper missing; ticks all five; sails; records a refund	Every rupee figure moved · the sailing was refused · with five papers it was allowed · the refund moved from owed to received
POS	Builds a cart; tries to bill while short; pays in full; closes the day short	Nothing printed while short · it printed when covered · the cart cleared · the day closed with the exact difference
Quotes	Raises a quote; tries to advance an expired one; re-quotes it; saves a revision	The expired quote did not move · re-quoting created a new one · the revision saved without changing the first

Every screenshot in every one of these PDFs was captured from the shipped file at double resolution, in the state its caption describes. Nothing is a mock-up.

Where this sits, and what comes next

Sixteen modules and forty apps, in the order they are being built: see the business, know who you deal with, then record what you sell.

#	MODULE & APPS	STATUS
01	Dashboard & BI — CEO Dashboard · Report Builder	Delivered
02	CRM — CRM & Customer 360	Delivered
03	Sales — D2C Sales · B2B & Credit · Export · POS · Quotes & Proforma	Delivered — you are holding it
04	E-commerce / OMS — Marketplace OMS · Order Management	Next
05	Warehouse — Picking & Bins · Barcode Operations	
06	Logistics — Couriers & AWB	
07	Inventory & Catalog — Stock · Catalog / PIM	
08	Manufacturing — Production Orders · Karigar & Piece-rate · BOM & Consumption · Quality Control	
09	Purchase — Procurement · Vendor Management	
10	HR & Payroll — Staff & Karigar · Time-off & Advances · Appraisal & Hiring	
11	Accounting & GST — Accounting · Invoicing · Expenses · GST & Tax · Finance Reports	
12	Settlement — Reconciliation · Claims & Disputes · Returns / RMA	
13	Marketing — Social Calendar · Campaigns · Repricing Engine · Automation	
14	AI Content Engine — Content Engine	
15	Image Studio — Image Studio	
16	Video Studio — Video Studio	
—	Platform — Identity, Settings & Audit	The spine every module runs on

Module 03 is accepted when: all ten apps open by double-click with no internet · all 342 self-tests pass · each of the five gates refuses what it should · all 42 workflow assertions hold · a backup exports and imports cleanly on a computer and a phone.
