15

Modules, one login

62

Apps over one data core

1

Stock number for every SKU

7

Marketplaces connected

WHAT MEDHAVA IS

One application. Not eleven that talk to each other.

Every other suite sells you separate products and a sync job between them. Medhava is a single application over one set of records — so there is nothing to synchronise, and nothing to reconcile.

1

Enter it once

A goods receipt, a counter sale, a marketplace order — recorded in one place. Stock, the ledger, the quality record and the supplier scorecard all update in the same instant, because they are reading the same record.

2

Numbers that cannot disagree

One stock figure per SKU. One ledger. One order record. Not a copy per channel that somebody reconciles on Saturday. When the website says four are left, four are left.

3

Built for how India actually runs

GST with input credit on accepted goods, TDS and TCS, seven marketplaces, piece-rate karigar wages — and apps that keep working when the internet does not.

WHAT CHANGES FOR YOU

The same day, before and after

Nothing here is a new way to run your business. It is the work you already do, arranged so that it only has to be done once.

TODAY

- ✗ Log into seven seller panels, one at a time
- ✗ Copy each order into a sheet, then into the books
- ✗ Guess which stock figure is the real one
- ✗ Learn at month-end that a mill over-billed you
- ✗ Chase a marketplace shortfall you spotted six weeks late
- ✗ Ask three people for their file before you can see one number

WITH MEDHAHA

- One queue, sorted by whichever order is closest to being late
- The order writes itself into stock and into the ledger
- There is one stock figure, so there is nothing to choose between
- An over-billed invoice cannot be paid — the match refuses it
- Every shortfall is on a screen the day the payout lands
- Open the dashboard. It was already up to date.

Medhava at a glance

What it is	A unified ERP: 15 modules and 62 apps sharing one data core and one event bus.
Shared data core	Item/SKU · Party · Stock · Ledger & Voucher · Order — every module reads and writes these.
Key difference	Not a suite of integrated apps. One application, so there is no sync step and no duplicate master data.
Compliance	Double-entry accounting with CGST/SGST/IGST, TDS, TCS, ITC on accepted goods, GSTR-1 and GSTR-3B.
Channels	Amazon, Flipkart, Myntra, Meesho, Ajio, Nykaa, JioMart, plus Shopify and WooCommerce.
Security	PostgreSQL row-level security per company; integrations use revocable scoped API keys in an AES-256-GCM vault — never account passwords.
Deployment	Hosted multi-tenant cloud, or single-file offline apps that run by double-clicking with no install.

THE PROBLEM

Your business runs on eleven tools that don't talk

Accounting in one place, stock in a spreadsheet, marketplace orders in seven seller panels, karigar wages in a notebook. Every month-end becomes an archaeology project.

Numbers that disagree

Stock says 40, the marketplace says 12, the books say something else again. Nobody knows which is right, so everyone guesses.

Work entered three times

The same invoice keyed into the seller panel, the spreadsheet and the accounting package. Three chances to be wrong.

Money quietly leaking

Over-billed purchases, unclaimed marketplace shortfalls, RTO losses — invisible until the year is over.

HOW IT WORKS

One data core. One action cascades everywhere.

Every module reads and writes the same five entities. That is the physical reason a single goods receipt can touch stock, books, quality and sourcing at the same instant.

UNIFIED DATA CORE

Item / SKU

Party

Stock

Ledger

Order

→ Inventory · stock in

→ Finance · payable & ITC

→ Quality · debit note

→ Sourcing · risk updated

← Planning · requirements

← Marketplace · order pull

Accepted — not ordered — is what counts

You order 100 metres. 100 arrive. Quality accepts 96. Most systems increase stock by 100 and claim tax credit on 100. Medhava increases stock by **96**, claims input tax credit on **96**, raises a debit note for the 4 rejected, and lowers that mill's accept rate — automatically.

Nothing derived is ever stored

Outstanding, risk, performance, aging, profit-per-design — all recomputed on read. They cannot drift out of step with the documents underneath them.

MODULES & APPS

15 modules. 62 apps. One login.

Each module is a complete area of your business. Turn on what you need today — everything else is already wired for the day you need it.

MODULE 01

Dashboard & BI

See the whole house without asking anyone.

Every number rolls up here as work happens — the day's marketplace orders, what the karigars finished, what is still lying at the dyer, what the mills are owed. No exports, no waiting for month-end.

READS FROM

Every module

WRITES TO

—

CEO Dashboard
Cash, sales by channel, stock by design, profit per piece and the alerts that matter — one screen, refreshed as the day runs.

Report Builder
Drag the fields you want into a report and save it for the whole team.

Group Consolidation
Vastrangam and the ethnic-wear arm as one set of figures, inter-company transfers removed, so the group position is real rather than two spreadsheets added together.

3

APPS

MODULE 02

CRM

Know every boutique, chain and customer completely.

One record per party — a Kalamandir or a Rajmandir, a Surat walk-in or a Myntra buyer — carrying every enquiry, order, return, agreement and conversation, whichever channel it arrived on.

READS FROM

Every module

WRITES TO

SalesE-commerce / OMSMarketing

CRM & Customer 360
Enquiry to confirmed order, then the full lifetime: what they bought, what came back, what they are worth and which new range to show them first.

Documents & eSign
Mill agreements, job-work contracts, signed delivery challans, export documents and boutique credit terms filed against the party or order they belong to — found by that record, not by hunting through a folder.

Helpdesk & Live Chat
A boutique asking where its parcel is, or a customer asking about a size — the question becomes a ticket tied to the order, with the whole history already open.

3

APPS

MODULE 03

Sales

Counter, wholesale, website and export — one order book.

The Surat counter, the boutique wholesale book, the website and the export shipment all write to the same order and draw on the same stock number. And the parcel is followed to the door, because a sale is not done until the COD money is in.

Inventory & CatalogCRMWarehouseLogistics

WRITES TO

Inventory & CatalogAccounting & GSTWarehouseLogistics

6

APPS

D2C Sales

Orders from your own storefront, cart to dispatch, with loyalty and partial COD on a ₹4,400 anarkali.

B2B & Credit

Boutique and chain orders on credit limits and tier pricing, with outstanding aged against each party's own agreed terms.

Export

Commercial invoice, packing list, LUT bond and IGST-refund tracking for the Gulf and UK buyers.

POS

Counter billing at Udhna that draws on the same stock as the website — no second stock register.

Quotes & Proforma

Send a quote, convert it to a confirmed order in one click.

Couriers & AWB

Book the parcel on the order, compare couriers for that pin code, print the label with the design code on it, and follow the AWB to the door.

MODULE 04

E-commerce / OMS

Seven panels, one queue — and every rupee accounted for.

6

APPS

Stop logging into Myntra, then Flipkart, then Ajio. Every marketplace order lands in one pipeline and your stock goes out to all of them — then the money side closes out in the same module: what the panel paid, what it kept as commission, what came back, and what it still owes you.

Warehouse

Logistics

Settlement

Marketplace OMS

Myntra, Flipkart, Ajio, Amazon, Meesho, Nykaa and JioMart in a single queue — processed all together, or channel-wise, or design-wise, whichever way you want to pick and pack today.

Order Management

One pipeline from new to delivered, whatever channel it arrived on.

Manual Data Check

The order and return sheets you already download from the panels, and the offline registers from the three shops — one file or a whole ZIP — read back as ten cross-checks: net sale after commission and fees, month, design, state, wrong returns, SPF claims, ads, payouts and GST. Every figure clicks through to the transactions behind it.

Reconciliation

Match every marketplace payout to the order line that earned it, and expose the gap.

Claims & Disputes

Weight disputes, SPF shortfalls, parcels lost in transit and returns that came back with a different piece inside — filed as claims with the packing footage attached.

Returns / RMA

Customer returns, courier returns and wrong returns kept apart — because only one of the three is really your fault, and only one of them turns into dead stock.

MODULE 05

Warehouse

Pick the right design first time — and prove what you sent.

3

APPS

Bin-level instructions and barcode scanning so the right piece leaves the godown and stock stays honest — and a recording of each parcel being packed, because a wrong-return claim is settled by footage, not by argument.

READS FROM

Sales

E-commerce / OMS

Inventory & Catalog

WRITES TO

Inventory & Catalog

Sales

E-commerce / OMS

Picking & Bins

Pick lists in walking order through the godown, by design and size, so nobody crosses the floor twice.

Barcode Operations

Scan to pick, pack, dispatch and run a physical stock count from a phone.

Packing Video

Every parcel filmed as it is packed and indexed by its order number, so when a panel says the wrong piece was sent, the clip goes into the claim.

MODULE 06

Logistics

The courier network — rates, failed deliveries and the COD money.

3

APPS

Booking one parcel happens on the order. This module is the network behind it: what Delhivery, Blue Dart and the rest charge to that pin code before you pick one, what happens to a delivery that fails in a small town, and whether the cash collected at the door reached your bank.

READS FROM

Sales

E-commerce / OMS

Warehouse

WRITES TO

Accounting & GST

Sales

E-commerce / OMS

Rates & Zones

Every courier's rate card by zone, weight slab and service — so the cheapest and the fastest option for this parcel are both known before it is booked.

NDR & RTO Rescue

A failed delivery worked while it can still be saved — reattempt, call, correct the address — before it becomes a return you pay for twice.

COD Remittance

What the courier collected at the door against what reached the Surat account, parcel by parcel, with every shortfall named and aged.

MODULE 07

Inventory & Catalog

One stock number everyone trusts.

2

APPS

The most important number in the house: one quantity per design and size, per godown, per stage — greige, dyed, in stitching, finished, listed. Read and written by every other module. And one product record every marketplace lists from.

READS FROM

Every module

WRITES TO

Every module

Stock

Live quantity by design, size and location, fabric in metres and pieces in numbers, with reorder alerts, lot tracking, set kits and dead-stock ageing.

Catalog / PIM

One record per design — fabric, work, length, colour, size chart, images, HSN and price — scored for Myntra and Amazon readiness before it is listed anywhere.

MODULE 08

Manufacturing

Know what a piece really costs to make.

6

APPS

From the cut plan to the finished piece — what each karigar earned, what the dyer charged, what the zari cost, and what that design actually cost before you priced it.

Purchase

Inventory & Catalog

WRITES TO

Inventory & Catalog

HR & Payroll

Accounting & GST

PLM & Development

Concept to a design that can actually be made: fabric and trim specification, sample rounds with the mill, costed trials against a target price, and sign-off — every version kept, so last season's costing is still there.

Production Orders

Cutting, stitching, embroidery, washing, finishing and checking — your own stages, with work-in-progress visible at each and nothing lost at the dyer.

Piece-rate & Contractors

Karigars paid by the piece: pooled set completion, per-garment rates, alterations, rework and advances resolved into one payout.

BOM & Consumption

What each design consumes — metres of fabric, zari, lining, buttons, packing — costed at today's mill rates.

Quality Control

Accept, reject or send for rework, with reasons that feed the mill's accept rate and the karigar's record.

Maintenance

Machines and the building: what is due for service, when it was last done, what it cost, and what stopped while it was down.

MODULE 09 · AVAILABLE NOW

Purchase

Nothing over-billed by a mill gets paid.

2

APPS

The buy side end to end — mills, dyers, job workers and packing suppliers — with the control that stops you paying for metres you rejected.

Accounting & GST

Quality Control

Procurement LIVE

Enquiry to purchase order to goods receipt, with a strict three-way match: you ordered 100 metres, 100 arrived, quality accepted 96, and the bill is only cleared for 96.

Vendor Management LIVE

Mill 360 — payables, ageing, a real risk score from accept rate and spend concentration, and sourcing that follows performance rather than habit.

MODULE 10

HR & Payroll

Pay everyone right, on time.

3

APPS

Office staff on a monthly salary and karigars paid by the piece, in one register, with attendance driving both and the festival advance already deducted.

READS FROM

Manufacturing

WRITES TO

Accounting & GST

Staff & Contractors

Attendance marked by tap, effective-dated salary, and karigar piece-rate earnings in a single register.

Time-off & Advances

Leave, Diwali advances, and exactly how they change this month's payout before you approve it.

Appraisal & Hiring

Performance reviews and a hiring pipeline that ends in an employee record.

MODULE 11

Accounting & GST

Books that always balance — and no BUSY needed.

5

APPS

A full double-entry ledger built for Indian compliance, keeping the books itself. B2B sales, returns, mill purchases, payments and receipts are entered by hand because a person decides them; every website, marketplace and counter sale posts itself.

READS FROM

Every module

WRITES TO

Finance Reports

Accounting

Double-entry books where every voucher balances and the trial balance always ties.

Invoicing

GST tax invoices and receipts, totals computed from the lines to the paise.

Expenses

Spend captured by category with approvals, and bill OCR to save typing.

GST & Tax

CGST, SGST, IGST, TDS, TCS, input credit, GSTR-1 and GSTR-3B.

Finance Reports

P&L, balance sheet, and profit by channel, design and SKU — so you know which anarkali actually earned money after commission, shipping and returns.

MODULE 12

Settlement

Get paid what the panels owe you — cycle by cycle.

3

APPS

Matching one payout to one order line happens in OMS. This is the level above: the settlement cycle each panel runs, the commission it actually charged against the rate card it published, and the TCS it deducted in your name.

READS FROM

E-commerce / OMS

Accounting & GST

WRITES TO

Accounting & GST

Payout Cycles

Every settlement cycle each panel runs — what it should pay, what actually landed in the bank, and on which day — so a late payout is visible the day it is late, not at month end.

Fee & Commission Audit

The commission Myntra publishes for a category against the commission it actually took, style by style. A quiet rate change is caught the first time it is applied, not at year end.

TCS & TDS Register

Every rupee the panels deducted as TCS, and TDS on job work, matched against the portal's own figures — so the credit you claim is the credit you are owed.

MODULE 13

Marketing

Sell more without cutting the price.

5

APPS

Plan the festive calendar, run the campaigns, and let rules keep you competitive on the panels without giving the margin away.

READS FROM

Inventory & Catalog

CRM

WRITES TO

Sales

E-commerce / OMS

Social Calendar

Plan and publish across every channel from one calendar.

Repricing Engine

Rules per panel and per design — floor, ceiling, match-lowest and a festive override — so a Diwali sale does not quietly go below cost.

Blog & Pages

How to drape it, what to wear it to, which fabric for which season — written, scheduled and published to your own site with the meta and internal links already set.

Campaigns

Email, SMS and WhatsApp campaigns measured on real revenue, not opens.

Automation

If this happens, do that — across any module, without writing code.

MODULE 14

AI Content Engine

Write it, shoot it, cut it — from your own catalogue.

5

APPS

Listings, ads, reels and product photography generated from your own designs, in a voice that sounds like one person from Surat rather than a template — so the words match the piece and the picture is the size Myntra actually wants.

READS FROM

Inventory & Catalog

WRITES TO

Marketing

E-commerce / OMS

Content Engine

Fourteen stages in your own voice — buyer psychology, competitor reading, hooks, the product description, marketplace copy for Amazon and Myntra, ad variations, reel scripts, song lyrics for the reel, the calendar, size chart and alt text.

Image Studio

A phone photo becomes a listing image: layers, free transform, background removal, Myntra 1080×1440 and every other channel preset, watermark and SEO alt text.

Video Studio

Text and image to video, reels and ad cuts sized for every channel.

Design Studio

Banners, festive creatives and thumbnails — templates, layers, undo and redo, any colour, exact sizing and stock elements, exporting PNG, JPG or PDF at whatever size the panel or the printer asks for.

Publisher

One push sends the listing, images and copy to the website and every panel, and reports back what went live and what a panel rejected, with the reason.

MODULE 15

Projects & Collaboration

The work that is not an order — and the talking around it.

5

APPS

An exhibition in Hyderabad, a boutique's custom order, a new godown fit-out, a legal matter with a supplier. Work that is not a sales order still has a deadline, a cost and documents — and it belongs on the same records as everything else.

READS FROM

WRITES TO

Accounting & GST

HR & Payroll

CRM

Projects & Cases

An exhibition, a custom order for a chain, a fit-out or a dispute — stages you define, owners, deadlines, documents, hours and real cost, all on one record the ledger can see.

Timesheets & Planning

Who is on what this week and the hours that actually went in — against a project, an exhibition or a machine — with billable and non-billable kept apart.

Approvals

One queue for everything waiting on a yes: a mill purchase order, a boutique discount, a leave day, a credit note, a payment. The rule that sent it there is next to it, and the decision goes on the record.

Forum

Questions and answers that outlive a chat — for customers, dealers or staff — with the useful ones kept where the next person will actually find them.

Discuss

The conversation attached to the record it is about — this order, this mill bill, this dispute — so a year later the reason for the decision is still sitting beside it.

PLATFORM · THE SPINE UNDER ALL 15

Platform

The spine the whole house runs on.

2
APPS

Not a module you open — the layer underneath all 15. Who can see what, how Vastrangam is configured, and a record of everything that ever happened.

READS FROM

WRITES TO

Every module

Identity, Settings & Audit

Users, roles and permissions, company switching, tax and numbering setup — and an immutable record of everything that ever happened.

Ask & Print

At an exhibition in Hyderabad, send one line from your phone: “ledger Kalamandir”, “print slips”. It comes back as a PDF, or it prints at the Surat office — with nothing plugged into your phone and nothing at the office open to the internet.

BUILT DEEP, NOT WIDE

The controls that pay for the software

Three-way match

A supplier bill only passes when the purchase order, the goods receipt and the invoice agree on price and quantity. Bills that over-charge or over-bill rejected goods are held automatically, with the reason in plain language.

Vendor risk that sees ahead

Risk blends weak performance, spend concentration and overdue bills. Your *best* supplier still flags medium risk when 44% of your buying sits with them — the fact worth knowing before a disruption, not after.

Settlement reconciliation

Import a marketplace settlement, match it to the orders, and see every commission, TCS deduction, weight discrepancy and short payment — with a claim pack ready to file.

Karigar piece-rate

Pooled set completion, per-garment rates, alteration hours and advances roll into each karigar’s payout — and into a true cost per piece for every design.

One stock number

One quantity per SKU per location per stage, pushed to every channel. Overselling stops being a monthly apology.

AI studio built in

Listings, ad copy, product photography and reels generated against your own catalogue — not a bolted-on chatbot, but the same data core.

INDUSTRIES

Built on the neutral engine, dressed for this trade

Every screen you are about to read is the same code as the Medhava edition. Only the master data and the words change — which is exactly why a machine shop or a law firm can run it too.

What is different here

Fabric in metres and pieces in numbers on the same item master. Karigar piece-rate with pooled set completion. Design-wise costing to the paise. HSN 5007 / 5208. Wrong-return dead stock treated as the loss it is.

The channels you actually sell on

Myntra, Flipkart, Ajio, Amazon, Meesho, Nykaa and JioMart in one queue, plus the Surat counter, the boutique wholesale book and export to the Gulf — all writing to the same order table.

The people who make it

Cutting, stitching, embroidery, finishing and checking as stages you set. Karigars paid by the piece, staff paid by the month, both in one register and one payout.

The compliance you file

GST on ethnic wear slabs, TCS the marketplaces deduct, TDS on job work, LUT bond and IGST refund on export — all worked out from the same vouchers.

COMPARISON

Medhava vs. a suite of integrated apps

The difference is architectural, not cosmetic.

CAPABILITY	MEDHAVA	TYPICAL SUITE
Architecture	One app, one data core	Many apps, integrated
Master data	Single Item & Party record	Duplicated per app, synced
Stock truth	One number per SKU × location	Per-app, reconciled nightly
Cross-module posting	Instant, via event bus	Scheduled sync jobs
Marketplace settlement	Reconciled to order line + claim pack	Usually a separate tool
Piece-rate manufacturing	Built in	Custom development
AI content & imaging	Native, on your catalogue	Third-party add-on
Offline capability	Single-file apps run offline	Cloud-only

TRUST & SECURITY

Your credentials are never the key

Scoped keys only

Marketplace, bank and courier connections use revocable, scoped API keys held in an AES-256-GCM vault. Medhava never asks for, uses or stores an account password.

Isolation by row

Every record carries a company id and is enforced by PostgreSQL row-level security. Group companies stay separate but consolidate on demand.

Immutable audit

Every posting, price change and permission grant is written to an append-only trail with actor, timestamp and before/after values.

PRICING

Talk to sales

QUESTIONS

Frequently asked

What is Medhava?

Medhava is a unified ERP made of 15 modules and 62 apps that all read and write one shared data core — Item/SKU, Party, Stock, Ledger and Order. Because the data is shared, a single action such as a goods receipt updates stock, the ledger, quality records and the vendor scorecard at the same time.

How is Medhava different from Zoho or Odoo?

Does Medhava support Indian GST?

Which marketplaces does Medhava connect to?

Can Medhava be used outside textiles?

Is my data safe?

Can I use it without internet?

How long does implementation take?

Stop reconciling. Start running.

See your own numbers inside Medhava. Bring one month of sales, purchases and stock — we will show you what your current tools are hiding.

Modules, one login

62

Apps over one data core

1

Stock number for every SKU

7

Marketplaces connected

WHAT MEDHAVA IS

One application. Not eleven that talk to each other.

Every other suite sells you separate products and a sync job between them. Medhava is a single application over one set of records — so there is nothing to synchronise, and nothing to reconcile.

1

Enter it once

A goods receipt, a counter sale, a marketplace order — recorded in one place. Stock, the ledger, the quality record and the supplier scorecard all update in the same instant, because they are reading the same record.

2

Numbers that cannot disagree

One stock figure per SKU. One ledger. One order record. Not a copy per channel that somebody reconciles on Saturday. When the website says four are left, four are left.

3

Built for how India actually runs

GST with input credit on accepted goods, TDS and TCS, seven marketplaces, piece-rate karigar wages — and apps that keep working when the internet does not.

WHAT CHANGES FOR YOU

The same day, before and after

Nothing here is a new way to run your business. It is the work you already do, arranged so that it only has to be done once.

TODAY

- ✗ Log into seven seller panels, one at a time
- ✗ Copy each order into a sheet, then into the books
- ✗ Guess which stock figure is the real one
- ✗ Learn at month-end that a mill over-billed you
- ✗ Chase a marketplace shortfall you spotted six weeks late
- ✗ Ask three people for their file before you can see one number

WITH MEDHAVA

- ✓ One queue, sorted by whichever order is closest to being late
- ✓ The order writes itself into stock and into the ledger
- ✓ There is one stock figure, so there is nothing to choose between
- ✓ An over-billed invoice cannot be paid — the match refuses it
- ✓ Every shortfall is on a screen the day the payout lands
- ✓ Open the dashboard. It was already up to date.

Medhava at a glance

What it is	A unified ERP: 15 modules and 62 apps sharing one data core and one event bus.
Shared data core	Item/SKU · Party · Stock · Ledger & Voucher · Order — every module reads and writes these.
Key difference	Not a suite of integrated apps. One application, so there is no sync step and no duplicate master data.
Compliance	Double-entry accounting with CGST/SGST/IGST, TDS, TCS, ITC on accepted goods, GSTR-1 and GSTR-3B.
Channels	Amazon, Flipkart, Myntra, Meesho, Ajio, Nykaa, JioMart, plus Shopify and WooCommerce.
Security	PostgreSQL row-level security per company; integrations use revocable scoped API keys in an AES-256-GCM vault — never account passwords.
Deployment	Hosted multi-tenant cloud, or single-file offline apps that run by double-clicking with no install.

Your business runs on eleven tools that don't talk

Accounting in one place, stock in a spreadsheet, marketplace orders in seven seller panels, karigar wages in a notebook. Every month-end becomes an archaeology project.

Numbers that disagree

Stock says 40, the marketplace says 12, the books say something else again. Nobody knows which is right, so everyone guesses.

Work entered three times

The same invoice keyed into the seller panel, the spreadsheet and the accounting package. Three chances to be wrong.

Money quietly leaking

Over-billed purchases, unclaimed marketplace shortfalls, RTO losses — invisible until the year is over.

HOW IT WORKS

One data core. One action cascades everywhere.

Every module reads and writes the same five entities. That is the physical reason a single goods receipt can touch stock, books, quality and sourcing at the same instant.

Accepted — not ordered — is what counts

You order 100 metres. 100 arrive. Quality accepts 96. Most systems increase stock by 100 and claim tax credit on 100. Medhava increases stock by **96**, claims input tax credit on **96**, raises a debit note for the 4 rejected, and lowers that mill's accept rate — automatically.

Nothing derived is ever stored

Outstanding, risk, performance, aging, profit-per-design — all recomputed on read. They cannot drift out of step with the documents underneath them.

15 modules. 62 apps. One login.

Each module is a complete area of your business. Turn on what you need today — everything else is already wired for the day you need it.

MODULE 01

Dashboard & BI

See the whole house without asking anyone.

Every number rolls up here as work happens — the day's marketplace orders, what the karigars finished, what is still lying at the dyer, what the mills are owed. No exports, no waiting for month-end.

READS FROM

Every module

WRITES TO

—

CEO Dashboard

Cash, sales by channel, stock by design, profit per piece and the alerts that matter — one screen, refreshed as the day runs.

Report Builder

Drag the fields you want into a report and save it for the whole team.

Group Consolidation

Vastrangam and the ethnic-wear arm as one set of figures, inter-company transfers removed, so the group position is real rather than two spreadsheets added together.

MODULE 02

CRM

Know every boutique, chain and customer completely.

One record per party — a Kalamandir or a Rajmandir, a Surat walk-in or a Myntra buyer — carrying every enquiry, order, return, agreement and conversation, whichever channel it arrived on.

READS FROM

Every module

WRITES TO

SalesE-commerce / OMSMarketing

CRM & Customer 360

Enquiry to confirmed order, then the full lifetime: what they bought, what came back, what they are worth and which new range to show them first.

Documents & eSign

Mill agreements, job-work contracts, signed delivery challans, export documents and boutique credit terms filed against the party or order they belong to — found by that record, not by hunting through a folder.

Helpdesk & Live Chat

A boutique asking where its parcel is, or a customer asking about a size — the question becomes a ticket tied to the order, with the whole history already open.

MODULE 03

Sales

Counter, wholesale, website and export — one order book.

The Surat counter, the boutique wholesale book, the website and the export shipment all write to the same order and draw on the same stock number. And the parcel is followed to the door, because a sale is not done until the COD money is in.

Inventory & CatalogCRMWarehouseLogistics

WRITES TO

Inventory & CatalogAccounting & GSTWarehouseLogistics

 **D2C Sales**
Orders from your own storefront, cart to dispatch, with loyalty and partial COD on a ₹4,400 anarkali.

 **B2B & Credit**
Boutique and chain orders on credit limits and tier pricing, with outstanding aged against each party's own agreed terms.

 **Export**
Commercial invoice, packing list, LUT bond and IGST-refund tracking for the Gulf and UK buyers.

 **POS**
Counter billing at Udhna that draws on the same stock as the website — no second stock register.

 **Quotes & Proforma**
Send a quote, convert it to a confirmed order in one click.

 **Couriers & AWB**
Book the parcel on the order, compare couriers for that pin code, print the label with the design code on it, and follow the AWB to the door.

 **MODULE 04**
E-commerce / OMS
Seven panels, one queue — and every rupee accounted for.

Logistics

Settlement

 **Marketplace OMS**
Myntra, Flipkart, Ajio, Amazon, Meesho, Nykaa and JioMart in a single queue — processed all together, or channel-wise, or design-wise, whichever way you want to pick and pack today.

 **Order Management**
One pipeline from new to delivered, whatever channel it arrived on.

 **Manual Data Check**
The order and return sheets you already download from the panels, and the offline registers from the three shops — one file or a whole ZIP — read back as ten cross-checks: net sale after commission and fees, month, design, state, wrong returns, SPF claims, ads, payouts and GST. Every figure clicks through to the transactions behind it.

 **Reconciliation**
Match every marketplace payout to the order line that earned it, and expose the gap.

 **Claims & Disputes**
Weight disputes, SPF shortfalls, parcels lost in transit and returns that came back with a different piece inside — filed as claims with the packing footage attached.

 **Returns / RMA**
Customer returns, courier returns and wrong returns kept apart — because only one of the three is really your fault, and only one of them turns into dead stock.

 **MODULE 05**
Warehouse
Pick the right design first time — and prove what you sent.

Sales

E-commerce / OMS

 **Picking & Bins**
Pick lists in walking order through the godown, by design and size, so nobody crosses the floor twice.

 **Barcode Operations**
Scan to pick, pack, dispatch and run a physical stock count from a phone.

 **Packing Video**
Every parcel filmed as it is packed and indexed by its order number, so when a panel says the wrong piece was sent, the clip goes into the claim.

 **MODULE 06**
Logistics
The courier network — rates, failed deliveries and the COD money.

3
APPS

Booking one parcel happens on the order. This module is the network behind it: what Delhivery, Blue Dart and the rest charge to that pin code before you pick one, what happens to a delivery that fails in a small town, and whether the cash collected at the door reached your bank.

READS FROM

Warehouse

WRITES TO

Accounting & GST

Sales

E-commerce / OMS

Rates & Zones

Every courier's rate card by zone, weight slab and service — so the cheapest and the fastest option for this parcel are both known before it is booked.

NDR & RTO Rescue

A failed delivery worked while it can still be saved — reattempt, call, correct the address — before it becomes a return you pay for twice.

COD Remittance

What the courier collected at the door against what reached the Surat account, parcel by parcel, with every shortfall named and aged.

MODULE 07

Inventory & Catalog

One stock number everyone trusts.

2

APPS

The most important number in the house: one quantity per design and size, per godown, per stage — greige, dyed, in stitching, finished, listed. Read and written by every other module. And one product record every marketplace lists from.

READS FROM

Every module

WRITES TO

Every module

Stock

Live quantity by design, size and location, fabric in metres and pieces in numbers, with reorder alerts, lot tracking, set kits and dead-stock ageing.

Catalog / PIM

One record per design — fabric, work, length, colour, size chart, images, HSN and price — scored for Myntra and Amazon readiness before it is listed anywhere.

MODULE 08

Manufacturing

Know what a piece really costs to make.

6

APPS

From the cut plan to the finished piece — what each karigar earned, what the dyer charged, what the zari cost, and what that design actually cost before you priced it.

READS FROM

Sales

Purchase

Inventory & Catalog

WRITES TO

Inventory & Catalog

HR & Payroll

Accounting & GST

PLM & Development

Concept to a design that can actually be made: fabric and trim specification, sample rounds with the mill, costed trials against a target price, and sign-off — every version kept, so last season's costing is still there.

Production Orders

Cutting, stitching, embroidery, washing, finishing and checking — your own stages, with work-in-progress visible at each and nothing lost at the dyer.

Piece-rate & Contractors

Karigars paid by the piece: pooled set completion, per-garment rates, alterations, rework and advances resolved into one payout.

BOM & Consumption

What each design consumes — metres of fabric, zari, lining, buttons, packing — costed at today's mill rates.

Quality Control

Accept, reject or send for rework, with reasons that feed the mill's accept rate and the karigar's record.

Maintenance

Machines and the building: what is due for service, when it was last done, what it cost, and what stopped while it was down.

MODULE 09 ·

AVAILABLE NOW

Purchase

Nothing over-billed by a mill gets paid.

2

APPS

The buy side end to end — mills, dyers, job workers and packing suppliers — with the control that stops you paying for metres you rejected.

Accounting & GST

Quality Control

Procurement LIVE

Enquiry to purchase order to goods receipt, with a strict three-way match: you ordered 100 metres, 100 arrived, quality accepted 96, and the bill is only cleared for 96.

Vendor Management LIVE

Mill 360 — payables, ageing, a real risk score from accept rate and spend concentration, and sourcing that follows performance rather than habit.

MODULE 10

HR & Payroll

Pay everyone right, on time.

3
APPS

Office staff on a monthly salary and karigars paid by the piece, in one register, with attendance driving both and the festival advance already deducted.

READS FROM

Manufacturing

WRITES TO

Accounting & GST

Staff & Contractors

Attendance marked by tap, effective-dated salary, and karigar piece-rate earnings in a single register.

Time-off & Advances

Leave, Diwali advances, and exactly how they change this month's payout before you approve it.

Appraisal & Hiring

Performance reviews and a hiring pipeline that ends in an employee record.

MODULE 11

Accounting & GST

Books that always balance — and no BUSY needed.

5
APPS

A full double-entry ledger built for Indian compliance, keeping the books itself. B2B sales, returns, mill purchases, payments and receipts are entered by hand because a person decides them; every website, marketplace and counter sale posts itself.

READS FROM

Every module

WRITES TO

Finance Reports

Accounting

Double-entry books where every voucher balances and the trial balance always ties.

Invoicing

GST tax invoices and receipts, totals computed from the lines to the paise.

Expenses

Spend captured by category with approvals, and bill OCR to save typing.

GST & Tax

CGST, SGST, IGST, TDS, TCS, input credit, GSTR-1 and GSTR-3B.

Finance Reports

P&L, balance sheet, and profit by channel, design and SKU — so you know which anarkali actually earned money after commission, shipping and returns.

MODULE 12

Settlement

Get paid what the panels owe you — cycle by cycle.

3
APPS

Matching one payout to one order line happens in OMS. This is the level above: the settlement cycle each panel runs, the commission it actually charged against the rate card it published, and the TCS it deducted in your name.

READS FROM

E-commerce / OMS

Accounting & GST

WRITES TO

Accounting & GST

Payout Cycles

Every settlement cycle each panel runs — what it should pay, what actually landed in the bank, and on which day — so a late payout is visible the day it is late, not at month end.

Fee & Commission Audit

The commission Myntra publishes for a category against the commission it actually took, style by style. A quiet rate change is caught the first time it is applied, not at year end.

TCS & TDS Register

Every rupee the panels deducted as TCS, and TDS on job work, matched against the portal's own figures — so the credit you claim is the credit you are owed.

MODULE 13

Marketing

Sell more without cutting the price.

5
APPS

Plan the festive calendar, run the campaigns, and let rules keep you competitive on the panels without giving the margin away.

READS FROM

Inventory & Catalog

CRM

WRITES TO

Sales

E-commerce / OMS

Social Calendar

Plan and publish across every channel from one calendar.

Repricing Engine

Rules per panel and per design — floor, ceiling, match-lowest and a festive override — so a Diwali sale does not quietly go below cost.

Blog & Pages

How to drape it, what to wear it to, which fabric for which season — written, scheduled and published to your own site with the meta and internal links already set.

Campaigns

Email, SMS and WhatsApp campaigns measured on real revenue, not opens.

Automation

If this happens, do that — across any module, without writing code.

MODULE 14

AI Content Engine

Write it, shoot it, cut it — from your own catalogue.

5

APPS

Listings, ads, reels and product photography generated from your own designs, in a voice that sounds like one person from Surat rather than a template — so the words match the piece and the picture is the size Myntra actually wants.

READS FROM

Inventory & Catalog

WRITES TO

Marketing

E-commerce / OMS

Content Engine

Fourteen stages in your own voice — buyer psychology, competitor reading, hooks, the product description, marketplace copy for Amazon and Myntra, ad variations, reel scripts, song lyrics for the reel, the calendar, size chart and alt text.

Image Studio

A phone photo becomes a listing image: layers, free transform, background removal, Myntra 1080×1440 and every other channel preset, watermark and SEO alt text.

Video Studio

Text and image to video, reels and ad cuts sized for every channel.

Design Studio

Banners, festive creatives and thumbnails — templates, layers, undo and redo, any colour, exact sizing and stock elements, exporting PNG, JPG or PDF at whatever size the panel or the printer asks for.

Publisher

One push sends the listing, images and copy to the website and every panel, and reports back what went live and what a panel rejected, with the reason.

MODULE 15

Projects & Collaboration

The work that is not an order — and the talking around it.

5

APPS

An exhibition in Hyderabad, a boutique’s custom order, a new godown fit-out, a legal matter with a supplier. Work that is not a sales order still has a deadline, a cost and documents — and it belongs on the same records as everything else.

READS FROM

CRM

HR & Payroll

CRM

Projects & Cases

An exhibition, a custom order for a chain, a fit-out or a dispute — stages you define, owners, deadlines, documents, hours and real cost, all on one record the ledger can see.

Timesheets & Planning

Who is on what this week and the hours that actually went in — against a project, an exhibition or a machine — with billable and non-billable kept apart.

Approvals

One queue for everything waiting on a yes: a mill purchase order, a boutique discount, a leave day, a credit note, a payment. The rule that sent it there is next to it, and the decision goes on the record.

Forum

Questions and answers that outlive a chat — for customers, dealers or staff — with the useful ones kept where the next person will actually find them.

Discuss

The conversation attached to the record it is about — this order, this mill bill, this dispute — so a year later the reason for the decision is still sitting beside it.

PLATFORM · THE SPINE UNDER ALL 15

Platform

The spine the whole house runs on.

2
APPS

Not a module you open — the layer underneath all 15. Who can see what, how Vastrangam is configured, and a record of everything that ever happened.

READS FROM

WRITES TO

Every module

Identity, Settings & Audit

Users, roles and permissions, company switching, tax and numbering setup — and an immutable record of everything that ever happened.

Ask & Print

At an exhibition in Hyderabad, send one line from your phone: “ledger Kalamandir”, “print slips”. It comes back as a PDF, or it prints at the Surat office — with nothing plugged into your phone and nothing at the office open to the internet.

BUILT DEEP, NOT WIDE

The controls that pay for the software

Three-way match

A supplier bill only passes when the purchase order, the goods receipt and the invoice agree on price and quantity. Bills that over-charge or over-bill rejected goods are held automatically, with the reason in plain language.

Vendor risk that sees ahead

Risk blends weak performance, spend concentration and overdue bills. Your *best* supplier still flags medium risk when 44% of your buying sits with them — the fact worth knowing before a disruption, not after.

Settlement reconciliation

Import a marketplace settlement, match it to the orders, and see every commission, TCS deduction, weight discrepancy and short payment — with a claim pack ready to file.

Karigar piece-rate

Pooled set completion, per-garment rates, alteration hours and advances roll into each karigar’s payout — and into a true cost per piece for every design.

One stock number

One quantity per SKU per location per stage, pushed to every channel. Overselling stops being a monthly apology.

AI studio built in

Listings, ad copy, product photography and reels generated against your own catalogue — not a bolted-on chatbot, but the same data core.

INDUSTRIES

Built on the neutral engine, dressed for this trade

Every screen you are about to read is the same code as the Medhava edition. Only the master data and the words change — which is exactly why a machine shop or a law firm can run it too.

What is different here

Fabric in metres and pieces in numbers on the same item master. Karigar piece-rate with pooled set completion. Design-wise costing to the paise. HSN 5007 / 5208. Wrong-return dead stock treated as the loss it is.

The channels you actually sell on

Myntra, Flipkart, Ajio, Amazon, Meesho, Nykaa and JioMart in one queue, plus the Surat counter, the boutique wholesale book and export to the Gulf — all writing to the same order table.

The people who make it

Cutting, stitching, embroidery, finishing and checking as stages you set. Karigars paid by the piece, staff paid by the month, both in one register and one payout.

The compliance you file

GST on ethnic wear slabs, TCS the marketplaces deduct, TDS on job work, LUT bond and IGST refund on export — all worked out from the same vouchers.

COMPARISON

Medhava vs. a suite of integrated apps

The difference is architectural, not cosmetic.

CAPABILITY	MEDHAVA	TYPICAL SUITE
Architecture	One app, one data core	Many apps, integrated
Master data	Single Item & Party record	Duplicated per app, synced
Stock truth	One number per SKU × location	Per-app, reconciled nightly
Cross-module posting	Instant, via event bus	Scheduled sync jobs
Marketplace settlement	Reconciled to order line + claim pack	Usually a separate tool
Piece-rate manufacturing	Built in	Custom development
AI content & imaging	Native, on your catalogue	Third-party add-on
Offline capability	Single-file apps run offline	Cloud-only

TRUST & SECURITY

Your credentials are never the key

Scoped keys only

Marketplace, bank and courier connections use revocable, scoped API keys held in an AES-256-GCM vault. Medhava never asks for, uses or stores an account password.

Isolation by row

Every record carries a company id and is enforced by PostgreSQL row-level security. Group companies stay separate but consolidate on demand.

Immutable audit

Every posting, price change and permission grant is written to an append-only trail with actor, timestamp and before/after values.

PRICING

QUESTIONS

Frequently asked

What is Medhava?

Medhava is a unified ERP made of 15 modules and 62 apps that all read and write one shared data core — Item/SKU, Party, Stock, Ledger and Order. Because the data is shared, a single action such as a goods receipt updates stock, the ledger, quality records and the vendor scorecard at the same time.

How is Medhava different from Zoho or Odoo?

Does Medhava support Indian GST?

Which marketplaces does Medhava connect to?

Can Medhava be used outside textiles?

Is my data safe?

Can I use it without internet?

How long does implementation take?

Stop reconciling. Start running.

See your own numbers inside Medhava. Bring one month of sales, purchases and stock — we will show you what your current tools are hiding.

[Book a 30-minute demo](#)
